ABOUT ME

I am a passionate and dedicated software engineer from Nairobi, Kenya, with hands-on experience in full-stack development. My academic journey and professional experience have equipped me with practical skills in software engineering, a problem-solving mindset, and a strong commitment to delivering high-quality solutions. I aim to leverage my technical expertise to create impactful and innovative solutions in the tech industry.

EDUCATION

Egerton University, Nakuru, Kenya

Bachelor of Science in Computer Science -Grade: Second Class Upper Division

WORK EXPERIENCE

E & M Technology House (On-Site Tatu City , Kiambu)

Software Developer

Nov 2024 - Present

- Role: Software Developer
- Technologies: Spring Boot, MariaDB, Angular ,Bootstrap
- Training Bootcamp Recruits
- Building and Maintaining existing Sacco Solution system
- Responsibilities:
 - Develop and Maintaining existing system
 - Training and guide Bootcamp recruits
 - Design system
 - System Integration i.e Bank API integration - COOPERATIVE BANK
 - Support Clients

YOUR NEXT HOME ENTERPRISES LIMITED (Remote, Nairobi)

Software Engineer

June 2023 - Present

Role: Software Developer

Technologies:Java with Spring Boot, PostgreSQL, Coolify, AWS, Beautifulsoup,RabbitMQ,CI/CD

AI Integration with Main Backend(SpringBoot):

- Led the integration of AI-powered property search using **Spring Boot** to connect the backend with an **NLP-based FastAPI AI service**.
- Developed an API endpoint to process user queries, communicate with the AI backend(FastApi), and retrieve matching property data.
- Implemented RabbitMQ to enable **asynchronous messaging**, syncing newly created or updated properties with the AI backend for real-time analysis.

- Designed a method to translate AI responses into database queries, efficiently fetching property details from **PostgreSQL** and returning them to the user.
- Applied **NLP (using BERT and spaCy)** to extract key data (e.g., location, amenities) from property descriptions, improving search relevance.

Scrum Leadership & Agile Practices:

- Facilitated daily scrum meetings to align progress, address blockers, and guide sprint planning.
- Oversaw the development and seamless integration of AI-powered search features into the property platform.

Code Review & Quality Assurance:

- Conducted code reviews via GitHub, ensuring code quality, performance, and consistency across services.
- Provided actionable feedback during PR reviews and assisted in resolving bugs and architectural issues.

Task Management & Workflow Tracking:

- Managed project workflows via **Jira**, delegating tasks, setting milestones, and tracking sprint progress.

Coordinated between developers, testers, and product managers to ensure timely delivery of features.

Cloud Deployment & CI/CD Management:

- Deployed applications to **AWS EC2 instances** using **Coolify**, managing end-to-end cloud deployment processes.

Maintained CI/CD pipelines to support fast, secure, and reliable feature releases.

Enaton Limited Company (Remote, Nairobi)

Software Developer

Frontend Developer: May 2024 - June 2024

➤ Technologies: React.js,
TypeScript, Express.js, Sequelize, TypeDI, TailwindCSS

- I collaborated on user interface development to deliver intuitive, user-friendly experiences.
- *Backend Developer: July 2024 - September 2024 (Multitenancy system)*
 - Technologies: Node.js, Sequelize, PostgreSQL, Puppeteer, Digital Ocean
 - It is built and maintained backend APIs, optimizing for performance and scalability.
 - Come up with database queries for designing the reports
 - Management deployments in Digital Ocean

EXPEDITION CODE (Remote, Nairobi)

Software Developer & Team Lead(Frontend)

September 2023 - August 2024 (Project on Hold)

- Role: Spearheaded front-end development as the Team Lead, guiding the team in React.js and TypeScript.
- Responsibilities: Coordinated team tasks, implemented best practices in code structure, and drove project success through mentorship and technical leadership.
- Design the e-commerce system (UI/UX)

LANSTAR TECHNOLOGIES (On-Site, Nairobi Westlands)

Software Developer Attachee'

May 2023 - July 2023

Responsibilities:

- Designed and generated reports using Jasper Reports with JavaEE, MySQL.
- Documented APIs in Redmine for easy reference and team collaboration.
- Developed and maintained APIs, collaborating closely with team members to ensure seamless software integration.
- Support Client Issues

SKILLS AND TECHNOLOGIES

Currently exploring and learning Elixir and it's ecosystem

Programming Languages: Java, TypeScript, Node.js

Frameworks & Libraries: Spring Boot, React/Next.js, Angular

Containerization: Docker

Databases: MySQL, PostgreSQL, MongoDB, MariaDB

Message Brokers: Apache Kafka, RabbitMQ

Cloud Services: AWS (EC2, S3), Pulumi

Platform as a Service (PaaS): Coolify

Operating Systems: Linux, Windows

Software Development Methodologies: RESTful API design, Software Architecture Patterns/Styles

Version Control: Git, GitHub

Integrated Development Environments (IDEs): VSCode, IntelliJ IDEA

API Testing: Postman

Project Management: Jira, Redmine

HOBBIES & INTERESTS

Beyond my professional life, I enjoy cycling, which provides a sense of freedom and an opportunity for exploration. I'm also an avid chess player, finding strategic depth and intellectual stimulation in each game.
