Education

BACHELOR OF SCIENCE IN
COMPUTER SCIENCE
Technical University if
Mombasa | SEP 2021 – APR
2025

CERTIFICATES

- AI for Software Engineering (Power Learn Project) | 2025 ongoing
- Kubernetes & Cloud Native (Kubernetes African Training) | 2025 ongoing
- Data & AI Specialization (cyber Shujaa) | 2025

Key Skills

Profile

Software Developer with 2+ years of expertise in full stack development, AI integration, and cloud-native solutions. Proven ability to design, develop, and optimize software applications across multiple languages and frameworks. Adept at collaborating in agile teams and solving complex problems with innovative solutions.

Professional Experience

INTERN SOFTWARE DEVELOPER
SWAHILIPOT HUB FOUNDATION - MAY 2024 – AUG 2024
MOMBASA

- Developed and maintained Web applications using Django, python, next.js and react. Swahilipot Fm, Swahilipot Website and Pwani innovation Week, and Asset management System were the project at hand.
- Debugged and optimize code for performance and scalability.
- Collaborated with cross-functional teams to implement user-centric features.

VOLUNTEER SOFTWARE DEVELOPER
MOMBASA RED CROSS LAB - MOMBASA SEP 2023 – DEC 2023

- Built a digital microscope using Arduino and C++, integrating hardware/ software components.

REMOTE SOFTWARE DEVELOPER
MICROVERSE MAY 2023 AUG 2023

- Developed a full-stack web app with JavaScript, HTML, and CSS in remote global team.

TECHNICAL SKILLS

- Languages: Python, JavaScript, C/C++, Java, Scala, PHP, C#, SQL, HTML/CSS.
- Frameworks/Tools: Django, React, Next.js, Node.js, Bootstrap, Git, Docker, Kubernetes.
- Databases: MySQL, PostgreSQL, MongoDB, SQLite.

Cloud Computing

Communication

Problem solving

Team leadership

Awards

- AI/ML: Scikit-learn, TensorFlow, Pandas, NumPy.
- Other: Arduino, Raspberry Pi, Linux CLI, AWS, Firebase.

PROJECTS

Predictive Employee Retention System

- Developed a machine learning model (Python/Django) to forecast turnover with 85% accuracy.
- Integrated JWT/auth and a Next.js dashboard for HR analytics.

Digital Microscope (IoT)

- Designed an educational tool with live zoom, data logging, and cloud storage using embedded systems.

Asset Management System

- Built a barcode-tagged asset tracker with Django, Next.js, and PostgreSQL, that enables organization to track and tag assets using barcode scanning.

Collaborative Document Editor

- Designed and developed a real- time Collaborative editor that allow users to Edit documents simultaneously
