Professional Summary

A detail-oriented and motivated Software Developer trained in full-stack development through an intensive, project-based program. Proven ability to translate business requirements into practical, reliable software, demonstrated by the successful completion of a capstone project building a financial application. Skilled in Java, SQL, and Agile methodologies, with a strong interest in applying my problem-solving skills to configure COTS solutions and develop reports for the e-government space. Eager to contribute to BQI Tech's mission of modernizing state and local government services.

Technical Competences

- Software Development: Java, JavaScript, Object-Oriented Design, RESTful APIs, COTS Configuration
- Databases & Reporting: SQL, MySQL, PostgreSQL, SSRS (Keen to Develop)
- Development Lifecycle: Agile/Scrum, Waterfall, Requirements Analysis, Testing, Documentation
- DevOps & Tools: Docker, Jenkins, Git, GitHub
- Front-End Development: React, HTML, Tailwind CSS

Professional Experience

IT Consultant | C.Mputhia Advocates, Karen, Nairobi | March 2024 – March 2025

- Managed and secured WordPress websites, performing plugin updates, database optimization, and implementing IT security measures.
- Designed, developed, and deployed the firm's website using WordPress, Squarespace, and HostPinnacle.
- Provided comprehensive IT support and implemented software and hardware solutions for the firm.

- Automated repetitive tasks to significantly enhance operational efficiency and functionality.

Software Engineering Intern | Systech Limited, Nairobi, Kenya | August 2023 – February 2024

- Requirements Analysis & Solution Design: Analyzed functional specifications for a financial accounting system to design and configure a Java-based application that met core business needs.
- Full-Stack Development: Engineered a complete application, developing RESTful APIs with Java EE and a dynamic frontend with React.
- Testing & Documentation: Authored comprehensive technical and end-user documentation to ensure solution clarity and ease of use.
- DevOps Practices: Gained hands-on experience with modern tools like Docker and Jenkins for containerization and automating deployment workflows.
- Database Management: Utilized SQL for database operations and interactions within the application.

Projects

Point of Sale System APIs with M-Pesa Integration | (Java Spring Boot, React, M-Pesa API)

- Engineered a full-stack POS system, developing RESTful APIs with Java Spring Boot and a responsive frontend with React.
- Solved a complex integration problem by successfully implementing M-Pesa's STK Push for seamless payment processing, showcasing strong analytical and coding abilities.

Task TK – Team Management Application | (Java EE, React, PostgreSQL)

- Currently developing a work collaboration platform to help small businesses organize tasks and track progress.
- Designing and implementing efficient REST APIs with Java EE and designing an intuitive user interface with React.

Tour Booking System | (Node.js, Express.js, MongoDB, CSS)

- Developed a complete web application using the MVC architecture.
- Implemented user authentication, database interactions, and a dynamic user interface.

Education & Certifications

ALX Software Engineering Program | ALX School, Online | July 2022 – August 2023

- Specialized in Front-End Development and collaborative project-based learning.

Back-End Development Certificate | Udemy (Jonas Schmedtmann) | Online

- Focused on Node.js, Express.js, and MongoDB.

Bachelor of Business Information Technology | Jomo Kenyatta University of Agriculture and Technology (JKUAT)

- Graduated with Second Class Honors (Upper Division).

Interpersonal Skills

- Leadership & Team Coordination: Led a youth music team, fostering collaboration and a shared vision to deliver successful performances.
- Communication: Excellent written and oral communication skills, developed through conveying technical ideas and providing clear instructions in team settings.
- Initiative & Creativity: Proven ability to show initiative and creativity in developing IT solutions and automating processes.
- Adaptability & Learning: Quick learner, eager to adapt to new technologies and frameworks, as demonstrated by my diverse project stack.
