PROFESSIONAL SUMMARY

Self-driven and analytical Full-Stack Developer with a proven track record in designing, building, and enhancing end-to-end web applications. Proven ability to shape technical solutions that drive business value, with a keen interest in applying these skills across diverse industries. Expertise spans the entire technology stack, from front-end frameworks like Angular, React to server-side technologies and database management. Adept at collaborating within Agile teams, implementing CI/CD pipelines, and ensuring high-performance, secure, and responsive applications. A proactive problem-solver with a strong commitment to code quality, mentorship, and continuous improvement. Additionally experienced in IT infrastructure oversight, system integration, and coordinating with cross-functional teams and vendors to ensure reliable system performance and security..

EXPERIENCE

Full-Stack Software Developer

Innovex Solutions

Sept 2024 – Present

Nairobi, Kenya

- Contributed to the end-to-end redevelopment of a countrywide enterprise sales portal for Sanlam Allianz General Insurance Kenya, using **Angular, TypeScript and FastAPI** to create a robust, scalable platform for agents and branches.
- Developed both front-end components and **server-side logic** for core insurance features (new business, renewals, vehicle valuations), ensuring high performance and responsiveness.
- Integrated with external RESTful APIs for regulatory services like DMVC certificate issuance and double insurance checks, securing systems and ensuring compliance.
- Built reusable code and modular libraries to streamline future development and maintain consistency across the application.
- Implemented **CI/CD pipelines using Azure and Docker**, containerizing the application for efficient and scalable deployments.
- Collaborated with cross-functional teams (backend, UI/UX) within an **Agile environment** to translate complex business requirements into technical solutions and intuitive user interfaces.
- Assisted in preparing technical specifications and conducted thorough system testing to ensure features were ready for SIT/UAT and production release, adhering to strict change control procedures.

Founder & CEO

Munene.Dev

Aug 2024 – Present

Nairobi, Kenya

- Architect and deliver responsive full-stack web applications, managing projects from initial user requirement analysis to final deployment and technical user training.
- Engage directly with clients to analyze requirements and recommend scalable technical solutions that address their specific business needs.
- Acted as the primary liaison between clients, internal stakeholders, and third-party service providers (hosting platforms, payment gateways), managing system upgrades, service agreements, and ensuring alignment with business requirements.

- Built dynamic user interfaces using **React.js and TypeScript**, while also developing and optimizing **RESTful APIs with Node.js and Express.js**, demonstrating proficiency across the full stack.
- Authored comprehensive technical documentation and delivered technical user training, leading to a 20% increase in platform adoption among new users.
- Participated in an Agile team, contributing to sprint planning and the continuous delivery of new product functionality.

EDUCATION

Jomo Kenyatta University of Agriculture and TechnologySept 2020 – Aug 2023

BSC in Business Innovation and Technology Management

CERTIFICATIONS

- Software Development Bootcamp — GoMyCode Kenya (2024)
- AI Career Essentials — ALX Kenya (2024)

SKILLS

- **IT Infrastructure & Systems Management:** System Monitoring, Hardware/Software Troubleshooting, Network Administration, Backup & Disaster Recovery, Vendor Coordination, User Access Control.
- **Server-Side Technologies:** Node.js, Express.js, RESTful API Design
- **Client-Side Languages:** JavaScript, TypeScript, HTML5, CSS3.
- **JS Frameworks & Libraries:** Angular, React.js, Next.js, Bootstrap, Tailwind CSS, Material UI (MUI).
- **Database & OS:** SQL: PostgreSQL, MySQL, NoSQL (MongoDB); Windows, Linux.
- **DevOps & Agile Tools:** Git/GitHub, Azure DevOps, Docker, Nginx, CI/CD Pipelines.
- **Core Competencies:** Analytical & Problem-Solving Skills, Technical Documentation, User Training, Code Reviews, System Testing (SIT/UAT).

TECHNICAL PROJECTS

Sanlam Allianz Insurance Sales Portal (Angular, Typescript, FastAPI): Played a key role in the end-to-end redevelopment of a nationwide platform. Architected modular front-end features and contributed to backend integrations for motor insurance operations. Deployed using Docker and Azure CI/CD pipelines, ensuring high performance and scalability for production traffic.

Recon-Mate (React): Designed and built a full-stack reconciliation tool that automates matching between internal transaction exports and external payment provider statements. Applied strong analytical skills to solve a critical business problem, reducing manual effort for finance teams by 85%.

Class-Space (MERN Stack): Developed a web application using the MERN stack (MongoDB, Express.js, React, Node.js/Express.js) that enables students to locate and book vacant classrooms in real-time. Implemented server-side logic to eliminate double bookings and improve room utilization by 40%.
