EDUCATION

Bachelor of Business
Information Technology -
KCA University Nairobi Kenya

DevOps Engineering
Course
Moringa School

SKILLS

Backend Development:

- Python (Flask Django REST APIs, JSON)
- Relational Databases (PostgreSQL, MySQL), Query Optimization, ERD design
- Node.js

DevOps & Infrastructure:

- Docker, Docker Compose, Linux/Unix Environments, Terraform x Ansible
- CI/CD pipelines (GitHub Actions, basic Jenkins knowledge)
- Git/GitHub (branching, pull requests, version control best practices)
- Basic knowledge of cloud platforms ()

Core Foundations:

- Data Structures & Algorithms
- SQL (joins, indexes, triggers, stored procedures)
- Command-line interface and scripting

IMANI LAWRENCE

BACKEND DEVELOPER

PROFILE

Backend Developer with a strong foundation in database systems, backend APIs, and DevOps practices. Skilled in Python, PostgreSQL, and Docker, with hands-on experience designing relational schemas, building scalable APIs, and deploying applications in Linux/Unix environments. Proficient in GitHub workflows, CI/CD pipelines, and containerized development. Detail-oriented, analytical, and eager to deepen expertise in enterprise-level database design, performance tuning, and modern cloud database platforms.

WORK EXPERIENCE

Software Development Attachee
MobiPesa Limited Feb 2025- June 2025

Built and deployed backend APIs using Python (FastAPI) connected to PostgreSQL.

Designed database schemas, implemented migrations, and optimized SQL queries.

Containerized services using Docker for development and deployment.

Implemented CI/CD workflows with GitHub Actions for automated testing and deployment.

Collected and analyzed participant feedback and compiled post-program reports for the Customer Support roles

Provided basic tech support to clients and internal teams.

Documented support tickets and provided weekly summary reports to supervisors
