Profile

Results-driven Data Scientist with a strong foundation in statistical analysis, machine learning, and data storytelling. Experienced in building scalable data solutions and deploying models using Python, SQL, and cloud platforms. Skilled in transforming complex datasets into actionable insights through advanced analytics, predictive modeling, and interactive visualizations. Passionate about enabling data-driven decision-making and solving real-world problems in dynamic, fast-paced environments.

Skills & Expertise

- **ETL & Data Pipeline Development:** Designed and maintained efficient ETL pipelines for data warehousing. Expertise in constructing scalable pipelines to ingest, transform, and load diverse data sources
 - **Data Analysis & Reporting:** Expertise in real-time reporting via Power BI dashboards, KPI development, and performance tracking to guide product iterations.
 - **Business Intelligence & Reporting:** Data warehousing, ETL processes for customer data, reporting automation, insights delivery to stakeholders
 - **Machine Learning & AI:** Supervised & unsupervised learning for customer segmentation, RAG systems, predictive churn modeling
 - **Documentation & Requirements Gathering:** Proficient in creating flow charts, mock screens, and technical documentation (PRDs, user stories, and SOPs) to articulate business, user, functional, and system requirements.
 - **Programming & Data Engineering:** Python (Pandas, NumPy, scikit-learn), SQL, Flask, APIs, Docker, Git
 - **Collaboration & Communication:** Agile/Scrum, cross-functional teamwork, workshop facilitation, presentation skills
-

Technical Proficiencies

- **Languages & Libraries:** Python (Pandas, NumPy, scikit-learn), SQL, Stata
 - **Visualization & BI:** Matplotlib, Power BI
 - **Deployment & Cloud:** Flask, Heroku, AWS Elastic Beanstalk, Render
 - **Other Tools:** Docker, Git/GitHub, Agile/Scrum methodologies
-

Education

Masters of Data Science, Open University of Kenya, Ongoing

Bachelor of Economics, University of Nairobi

Data Science & AI Program, LuxDev HQ Academy

Data Engineering, LuxDev HQ Academy

Certifications

- Product Development & Customer Experience (Diploma)
 - Oracle Cloud Infrastructure 2025, Data Science Professional
 - Oracle Cloud Infrastructure 2025, Foundations Associate
 - Scrum Master Certification
 - Business Analyst Career Program
 - AI Career Essentials Program
 - Governance, Risk & Compliance in AI
-

Professional Experience

Research and Data Analyst – AI Engineer, CIO Africa by dx5

July 2025 - Present

In my capacity as a Research and Data Analyst- AI Engineer, I have achieved significant milestones:

- Designed and developed an AI Chatbot using LangChain and Groq to support the Research Department, guiding respondents through award application questionnaires and improving completion rates and data quality.
- Conducted end-to-end data analysis and reporting: ingest, clean, and transform survey and research data using Python and SQL.
- Designed and developed an AI agent using Lang graph and Groq to support the sales team, helps the sales team to run successful marketing campaigns by sending personalized proposals, improving sales records by 70%
- Collaborated with cross-functional teams to define KPIs and deliver data-driven recommendations that inform research strategies.

Junior Data Scientist, LuxDev HQ

January 2025 – June 2025

In my capacity as a Junior Data Scientist apprentice, I achieved significant milestones:

- Developed and deployed machine learning models to analyse large datasets and generate actionable insights.
- Designed and maintained data pipelines for efficient data warehousing and ETL processes.
- Utilized Python and SQL for data analysis, visualization, and reporting.
- Conducted data modelling to support decision-making and strategic planning.
- Collaborated with cross-functional teams to define and implement KPIs, promoting data-driven decision-making achieving a 20% cost reduction and a 42% revenue increase.

Commercial Performance Analyst, East African Breweries Limited

July 2024 – October 2024

In my capacity as a Commercial Performance Analyst at the East African Breweries Limited Company, I achieved significant milestones in supporting the Sales Department:

- Spearheaded category assortment reviews for 5 core brands, restructuring sub-categories to match consumer demand, boosting shelf-turn by 18%.
- Built dynamic pricing models in SQL and Python to adjust promotional mechanics in real-time, resulting in a 7% margin improvement across campaigns.
- Defined SOPs and KPIs for hero SKU placement and cross-sell recommendations, driving a 10% lift in add-on product attach rates.
- Contributed to the development of sales strategies and action plans to achieve business objectives that led to a 37% sales boost.
- Collaborated with regional sales and marketing teams to localize global product playbooks, ensuring on-brand execution in East Africa.

Projects

YouTube Multimodal AI Agent

Built a multimodal application that transcribes YouTube audio and integrates with an AI agent to deliver context-aware responses. Focused on agile product development, troubleshooting technical issues, and iteratively testing features before a successful deployment on Heroku.

Kenyan Constitution RAG Chatbot

Engineered a Retrieval-Augmented Generation chatbot using the Constitution of Kenya as its source. Leveraged LangChain, FAISS, and Groq for efficient retrieval, and deployed on Render with a multilingual Gradio interface.

US Retail Sales Time Series Analysis

Conducted a time series analysis of US retail sales to forecast trends using SARIMA and Prophet. Created interactive Power BI dashboards and a Flask-based web app for live forecasting, deployed on Render.

Interests

- AI Ethics & Responsible Innovation
- Marathon Training & Data-Driven Fitness Tracking
- Open-Source Contributions in Data Science
