FULL STACK DEVELOPER

Full Stack Developer with 1+ years of experience designing and delivering custom web applications using JavaScript, React, Python, and Laravel/PHP. Successfully built RESTful APIs, improving data retrieval efficiency and implemented lazy loading, reducing initial page load time. Proficient in utilizing Next.js, ShadCn, and Tailwind CSS to create responsive and modern user interfaces. Experience with containerization using Docker and CI/CD workflows through GitHub

TECHNICAL SKILLS

JavaScript, TypeScript, React, Next.js, Angular.js, ShadCn, Tailwind CSS, PHP, Laravel, Octane, FrankenPHP, Python, Flask, Node.js, MySQL, PostgreSQL, SQLite, Docker, CI/CD pipelines, GitHub, Git, RESTful APIs, JSON, XML, Linux.

TECHNICAL PROJECTS

Eventify - [GitHub](#) | [Live Demo](#)

An event management and ticketing platform where users can create and manage events while attendees can browse, register, and purchase tickets.

- Developed a scalable event management system using Python (Flask) and JavaScript (React).
- Built RESTful APIs, improving data retrieval efficiency by 30% through optimized queries.
- Integrated PostgreSQL for structured data storage, enabling seamless CRUD operations for event tracking.
- Deployed the backend on Render and the frontend on Vercel, enhancing performance and scalability.

Furniture Website - [GitHub](#) | [Live Demo](#)

A web application for showcasing a carpenter's completed projects, providing an interactive portfolio for potential clients.

- Developed the application using React, Tailwind CSS, and JavaScript, ensuring a responsive and modern UI/UX.
- Implemented lazy loading and React Suspense, reducing initial page load time by 40%.
- Designed reusable React components, improving code maintainability and enhancing user interaction.
- Utilized Agile development methodologies for effectively planning, iterating, and refining workflows.

CITAM Kitale Website - [Live Demo](#)

This is a church website built with Next.js, ShadCn, Tailwind and provides information about church services, sermons, events, ministries, and community outreach.

- React framework for server-side rendering and static site generation
- JavaScript library for building user interfaces
- Typed superset of JavaScript for improved developer experience

EXPERIENCE

Freelance	Kitale, Trans-Nzoia
Full Stack Developer	Jun 2023 - Present
• Delivered custom software solutions for diverse clients using JavaScript, Python, and TypeScript. • Communicated regularly with clients to ensure clear requirements and successful project outcomes.	
Khetia's Drapers	Kitale, Trans-Nzoia
IT Technician	Jan 2022 - May 2022
• Provided IT support, troubleshooting network issues and ensuring minimal downtime. • Configured and maintained hardware and software, optimizing system performance. • Assisted in data security measures and system updates to enhance efficiency.	

EDUCATION

Regenesys School	Nairobi, Nairobi
Data Science	Jan/2025 - Jul/2025
Moringa School	Nairobi, Nairobi
Software Development	Sep/2024 - Feb/2025
Chuka University	Chuka, Tharaka-Nithi
Bachelor's Degree in Applied Computer Science	Sep/2019 - Nov/2023
