PROFESSIONAL SUMMARY

IT Support & Systems Developer with 2+ years experience in ERPNext, system administration, and network troubleshooting. Skilled in Linux server management, API integrations, and cybersecurity best practices. Proven ability to improve system uptime, resolve technical issues, and deliver scalable solutions.

PROFESSIONAL EXPERIENCE

ERP Systems Developer — TeamWeb Africa | May 2025 – Present

- Improved customer satisfaction scores by 40% as measured by post-resolution surveys by providing fast, accurate onsite and remote technical support via chat, email, and phone — resolving ERP incidents and service requests with same-day turnaround.
- Reduced system downtime by 35% as measured by monthly uptime reports by diagnosing Linux server misconfigurations, applying OS administration best practices, and implementing proactive monitoring procedures.
- Integrated Whatsapp messages, SMS and M-Pesa Daraja API integrations, enabling seamless and automated payment processing for clients
- Enhanced financial decision-making as measured by report adoption rate by developing custom ERP reports and SQL data queries that simplified operational tracking for non-technical stakeholders.
- Strengthened security compliance as measured by zero access-related incidents by configuring role-based access controls (RBAC) and enforcing cybersecurity best practices across client environments.

Shopify Developer — Bogner & Partners | Aug 2025 – Oct 2025

- Improved store performance and user experience by optimizing Shopify themes and front-end design.
- Increased site usability by customizing storefront layouts and improving navigation and responsiveness.
- Resolved technical issues affecting customer checkout experience by troubleshooting storefront and theme-related problems.

ERPNext Systems Developer — Upande Limited | Sep 2024 – Jul 2025

- Achieved 95% SLA compliance as measured by CRM ticket closure reports by resolving 60+ customer support tickets through structured incident management and root-cause analysis.

- Reduced manual processing time by 30% as measured by transaction logs by automating ERP workflows using Python scripts, eliminating repetitive data entry tasks.
- Improved new user onboarding speed by 50% as measured by time-to-competency assessments by leading live training sessions and producing structured technical documentation.
- Increased business reporting efficiency as measured by dashboard adoption rate by building custom analytics dashboards using SQL, Chart.js, and Frappe Insights.
- Enabled seamless third-party integrations as measured by zero API downtime incidents by connecting Shopify APIs and M-Pesa Daraja APIs to ERPNext, improving end-to-end process automation.

IT Support Specialist — Systems Hub Limited | Nov 2023 – Feb 2024

- Maintained high service quality as measured by team SLA metrics by resolving 5+ daily IT support tickets covering network, VPN, Wi-Fi, and peripheral device issues.
- Improved team response efficiency as measured by average resolution time by documenting technical solutions and troubleshooting guides in Google Workspace knowledge base.
- Ensured stable network connectivity as measured by zero unplanned outages by monitoring performance using Nmap and Wireshark and proactively flagging anomalies.
- Minimised escalation turnaround time as measured by senior team feedback by following structured issue escalation procedures for complex technical incidents.

SKILLS & COMPETENCIES

Desktop & End-User Support: PC/Laptop/Mobile troubleshooting, Peripheral devices, Hardware diagnostics, OS installation & configuration (Windows 10/11, Linux/Ubuntu), Remote support tools, Device asset management & disposal

Networking & Connectivity: TCP/IP, DNS, DHCP, VPN, Wi-Fi troubleshooting, Nmap, Wireshark, Network monitoring

ITSM & Service Management: Incident management, SLA management, Service request fulfilment, ITSM ticketing (Jira, Frappe CRM), Escalation procedures, Technical documentation

Tools & Platforms: ERPNext, Frappe Framework, Google Workspace, Microsoft Office 365, Netlify, Frappe Insights, Git/GitHub, Postman, Notion, Shopify, Jira.

Technical: Python, JavaScript, HTML/CSS, SQL, REST APIs, Bootstrap, Tailwind CSS, SSL/TLS

Soft Skills: Client-facing communication, Independent problem-solving, Cross-functional collaboration, Training & documentation, Attention to detail, Accountability

EDUCATION

Bachelor of Science in Information Security & Forensics

KCA University, Nairobi | May 2019 – Dec 2024

CERTIFICATIONS

- AI Career Essentials — ALX Africa
- CompTIA Security+ (SY0-601) — Cybrary

PROJECTS & EXTRACURRICULAR

- PwC Digital Intelligence Virtual Internship: Conducted cybersecurity risk assessment and proposed a multi-layered client defense strategy covering endpoint security and access controls.
- Mastercard Cybersecurity Simulation: Identified phishing threats and delivered security awareness recommendations to reduce organisational risk exposure.
