Career Objective

A dedicated and adaptable Computer Technology graduate (Maseno University, Dec 2024) with strong skills in cybersecurity, IT support, networking, and cloud computing. Currently completing Penetration Testing & Ethical Hacking and Cloud & Network Security training under the Cyber Shujaa program (graduating Aug 2025). I am seeking opportunities to apply my technical expertise, problem-solving, and security knowledge in ICT and cybersecurity roles.

Education

Bachelor of Science in Computer Technology — Maseno University (Aug 2019- May 2024)

Kenya Certificate of Secondary Education (KCSE) — Litein High School (Feb 2015 –Dec 2018)

Cyber Shujaa Program (Ongoing, graduating Aug 27th 2025):

- **Penetration Testing & Ethical Hacking**
- **Cloud & Network Security**

Professional Experience

ICT Attachment – County Government of Nandi (May 2022 – Aug 2022)

- Provided network and hardware support including Ethernet cable crimping, printer troubleshooting, and system repairs.
- Assisted in software installation, configuration, and maintenance of IT systems.
- Supported government staff with day-to-day ICT needs, improving productivity.
- Documented technical issues and solutions for future use.

University Project – Home Security System

- Designed and built a home security system using Arduino Uno, motion sensors, relays, GSM module, alarms, and keypad.
- Integrated hardware and software components for real-time security alerts.

- Documented project processes and presented findings, demonstrating report writing and technical problem-solving skills.

Skills

- Cybersecurity: Penetration testing, ethical hacking, network security analysis, vulnerability assessment.
- Cloud Computing: AWS CLI, Docker, Nginx, cloud security (IAM, Lambda, S3).
- Networking & Systems: Troubleshooting, Ethernet setup, IT support, database basics (MySQL, Postgres).
- Programming: Go (piscine), basics of Python, Arduino IDE.
- Tools & Platforms: Wireshark, tcpdump, Hack The Box, flaws.cloud, CloudGoat, Microsoft Office Suite.
- Professional Skills: Communication, teamwork, report writing, research, problem solving, time management.

Achievements

- Completed ICT attachment, providing hands-on technical support in a government environment.
- Designed and implemented a functional Arduino-based home security system.
- Progressing through Cyber Shujaa advanced cybersecurity training, enhancing practical penetration testing and cloud security skills.

Personal Attributes

- Results-oriented and self-driven.
- Strong ethical and professional standards.
- Quick learner with adaptability to new technologies.
- Team player with excellent interpersonal skills.
