KEY SKILLS:

IT Network Administration | System Administration | IT Infrastructure Management | Hardware and Software Management | Database Administration and User Support | IT Security and Compliance | Project Coordination | IT Vendor Management | Leadership and Training | Communication and Reporting | Website and Advertising Management

Industry: Banking | FMCG Retail

EXPERIENCE

Senior Network and System Administrator, Creative Innovations Limited, July 1, 2021 – Present

1. IT Infrastructure Management: Oversees the company's IT network, including LAN/WAN systems, hardware, and software installations, maintenance, and troubleshooting. Ensures smooth operation of network infrastructure, including Active Directory, DNS, DHCP, and IP phone systems.
2. Network Security and Compliance: Monitors activities on Sophos Firewall, performs routine security checks, implements antivirus solutions, and ensures adherence to Information Security policies through compliance reviews.
3. Server and System Administration: Installs, configures, and maintains servers while performing routine audits, updates, and system maintenance. Manages user accounts, domains, and administrative privileges in Google Workspace and Active Directory.
4. Database and Application Management: Administers Oracle Orion Tools, coordinates with external support for resolving database outages, and ensures optimal performance of database systems.
5. IT Policy Development: Updates and coordinates the company's ICT policies to align with evolving technological and operational needs.
6. Website and Advertisement Updates: Regularly updates the company website, including managing advertising images and content.
7. Vendor and IT Service Coordination: Liaises with service providers to maintain ETR devices, ensure compliance with tax reporting requirements (ITAX), and support system servicing needs.
8. Technical Documentation and Reporting: Maintains up-to-date network diagrams, asset inventories, and generates reports for IT systems.
9. Performance Analysis and Optimization: Conducts resource utilization assessments and implements new technologies to strengthen IT infrastructure.
10. Technical Support: Provides end-user support for problem resolution, database queries, and ensures efficient functioning of systems and applications.
11. Compliance and Disaster Recovery: Implements data recovery processes and ensures IT systems align with business continuity and recovery plans.

Achievements:

- Implemented IT Policy for the Company
- **Cloud Adoption:** Deployed Google Workspace for the organization, improving collaboration and data access across departments.
- Reduced network downtime by 20% through proactive maintenance strategies.
- Implemented Active Directory for the Domain Control PC
- **Performance Monitoring:** Deployed network monitoring tools that proactively flagged issues, reducing troubleshooting time by 30%.
- **Enhanced Network Performance:** Reduced network downtime by 30% through proactive maintenance and streamlined troubleshooting processes.
- **Improved Security:** Implemented advanced firewall policies and antivirus solutions, reducing security incidents by 25%.
- **Database Uptime:** Ensured 99.9% uptime for mission-critical databases through rigorous monitoring and prompt resolution of outages.

ICT Officer, Charterhouse-Bank Limited, December 13, 2012 – May 31, 2021

1. **Network Administration:** Ensured seamless operation of network infrastructure, including network servers, file servers, proxy servers, mail servers, and web servers. Administered network security protocols, including IP address management, firewall maintenance, and VPN connectivity.
2. **IT Hardware and Software Support:** Provided comprehensive support for IT hardware, software, and networks. Troubleshooted and administered Windows Server (2003–2008) and Microsoft Office Professional applications.
3. **System Maintenance and Documentation:** Maintained an up-to-date inventory of computing equipment, software, and documentation. Supervised preventive maintenance schedules and vendor contracts.
4. **Disaster Recovery and Security:** Developed and maintained a disaster recovery plan. Ensured antivirus protection and network security compliance.
5. **Project Coordination and IT Service Delivery:** Collaborated with senior management to align IT infrastructure with organizational goals and deliver IT services within defined service-level agreements. Investigated network-related issues and proposed solutions.
6. **Vendor and Stakeholder Management:** Managed relationships with ICT vendors and key stakeholders, ensuring the successful execution of contracts and IT projects.
7. **Team Leadership and Training:** Trained and guided IT personnel, established work schedules, and cultivated a supportive culture to maintain high morale. Evaluated employee performance and provided constructive feedback.
8. **Customer Support and Troubleshooting:** Provided technical support to customers and staff by troubleshooting hardware and software issues, including onsite problem resolution.
9. **Reporting and Knowledge Development:** Prepared monthly incident and service request reports. Stayed updated on technological advancements and industry trends through meetings, conferences, and training sessions.
10. **Network Design and Architecture:** Played a key role in designing network architecture to support organizational needs and future scalability.

Achievements:

- Implemented a secure VPN solution for remote branches, improving connectivity by 30%
- Implemented the use of video conferencing for training of users in the bank
- **Streamlined IT Support:** Established a centralized helpdesk system, reducing IT issue resolution time by 30%.
- **Enhanced Data Security:** Deployed advanced cybersecurity measures, preventing potential data breaches and ensuring compliance with regulatory standards.
- **Network Optimization:** Improved inter-branch connectivity by setting up secure VPN solutions, increasing data transfer speeds by 20%.
- **Vendor Negotiation:** Collaborated with vendors to upgrade IT infrastructure, achieving a 10% cost-saving while improving service delivery.
- **Problem Resolution:** Successfully addressed recurring system issues, eliminating 90% of operational disruptions over a year.
- **Core Banking System Upgrade:** Led the migration from outdated core banking software to a modern platform, improving efficiency and customer service delivery.

IT Support, Charterhouse-Bank Limited, December 13, 2005 – November 2012

1. **Technical Support and Issue Resolution:** Delivered prompt IT support to staff through phone, in-person, and electronic communication channels. Resolved technical issues efficiently using available internal resources.
2. **Hardware and Software Management:** Installed, configured, and updated hardware and software systems as required to support business operations.
3. **Knowledge Base Development:** Created and maintained "tips and tricks" solutions for an online database and website to assist users in resolving common issues independently.
4. **Training and Onboarding:** Provided introductory training (both online and classroom-based) on company products to enhance user proficiency.
5. **Bug and Enhancement Management:** Logged and tracked bugs and enhancement requests to facilitate product improvements and address recurring technical challenges.

IT Support, Nairobi Business Communication, July 7, 2003 – November 30, 2005

1. **Networking and Server Administration:** Conducted routine network administration, operations, and technical support, including monitoring server performance and functionality.
2. **Research and Product Evaluation:** Researched emerging IT products, including hardware (IBM, Toshiba, HP) and software, to recommend suitable solutions for organizational needs.
3. **Hardware and Software Configuration:** Performed hardware and software configurations in compliance with established procedures and standards.
4. **Software Management:** Assisted with software distribution updates, scripting, testing, and user support to ensure smooth operations.

5. **Client Service and Problem-Solving:** Ensured high-quality service delivery to meet client satisfaction and formulated solutions to address technical challenges effectively.
6. **Collaboration and Feedback:** Engaged openly with clients and teams to offer solutions and gather feedback to enhance IT service quality.
