

Joan Wambui

Software Developer || Telecommunications Engineer

+254 757 121 023 | wambuijoan44@gmail.com | [LinkedIn](#) | [GitHub](#) | Kenya

SUMMARY

Software Developer with a background in Telecommunications and Information Technology, passionate about building efficient, secure, and user-friendly digital solutions. Currently seeking Junior Developer roles where I can apply my skills, continue learning, and add value to impactful tech projects while growing as an engineer.

SKILLS

Languages & Frameworks:

Python, JavaScript, Flask, Django, TypeScript, NestJS, NodeJS React, Tailwind, HTML/CSS

Database:

MySQL, SQLite, SQLAlchemy, PostgreSQL, SQL

API & Integration:

REST/JSON, REST/XML, SOAP, API documentation, API testing & troubleshooting, Swagger/OpenAPI, Postman, SoapUI, curl, JWT

DevOps & Systems:

Linux, Bash, Docker, Kubernetes, YAML

Networking & Telecom:

Fiber Design & Planning, Network Configuration, AutoCAD, LAN/WAN, Routing & Switching, Firewalls, SMSC, DNS, TCP/IP

Tools & Platforms:

Git, GitHub, GitLab, Vercel, Google Workspace, Microsoft Teams, Jira, ClickUp, Agile (Scrum) Swagger/OpenAPI, Firebase, Postman, SoapUI, curl, Pytest, Unittest, Trello, Visual Studio Code, Cursor, Docker Hub, Figma, Notion

Soft Skills:

Time Management, Communication, Problem-Solving, Teamwork & Collaboration, Rapid Learning & Adaptability, Attention to Detail, Agile Mindset

PROJECTS

[PayLite](#)

A Cli based A Mobile Phone Credit (Lipa Mdogo-Mdogo) backend system which will be used for tracking phone sales, installment payments, and customer records to ensure smooth credit management.

Stack: Python, Flask, SQLAlchemy, JWT, Postman, Swagger, SQLite, REST API.

MealMate

A meal planning app enabling users to manage recipes and meal schedules. Designed and implemented using React, Flask, and SQLAlchemy.

Stack: React, Flask, SQLAlchemy.

EXPERIENCE

Projects Officer | MovaPay Limited(Part-Time)

Nov 2024 – Present | Kenya

- Coordinating sprint planning, API integration timelines, and release cycles in collaboration with software engineers, QA teams, and product owners.
- Facilitating communication between cross-functional teams—bridging developers, DevOps, and business leads.
- Driving stakeholder alignment by collecting and translating feedback from teams and clients into actionable product improvements.
- Participating in API documentation reviews and feature design discussions, ensuring technical feasibility and alignment with customer needs.
- Overseeing end-to-end product testing workflows, validating that new features and system updates met quality standards before deployment.
- Maintaining comprehensive technical documentation and delivery timelines, providing stakeholders with transparent progress reporting.
- Tracking technical risks, system dependencies, and integration constraints across multiple workstreams, flagging blockers early and driving resolution.
- Translating client and internal feedback into structured product improvements and change requests, prioritizing enhancements with clear technical impact.

Fiber Design Planner | Adrian Kenya(Intern)

Feb 2024 – Oct 2024 Kenya

- Conducted site surveys and prepared High-Level (HLD) and Low-Level Designs (LLD) using Google Earth Pro, AutoCAD, and Global Mapper
- Generated project quotations in Connect Master and managed data migration to Lepton
- Collaborated cross-functionally for accurate design-to-deployment handovers.

Fiber Optical Network Field Technician (Attachment) | Adrian Kenya

Feb 2023 – May 2023 | Kenya

- Installed and tested fiber optic connections including OTDR validation
- Participated in network layout planning and troubleshooting connection issues
- Supported emergency response for outages and managed cable routing

Sales & Marketing Team Leader (Part-Time) | Fine Brands Ltd

May 2021 – June 2024 | Kenya

- Recruited, trained, and managed brand ambassadors
 - Monitored performance, provided ongoing training, and conducted market research
 - Reported daily activity and managed product knowledge delivery
-

EDUCATION

Moringa School – Full Stack Software Development
2024 – 2025

Machakos University – BSc. Telecommunications and Information Technology
2019 – 2024

CERTIFICATIONS

- CCNA 1: Introduction to Networks
 - CCNA 2: Switching, Routing and Wireless Essentials
 - CCNA Cybersecurity Essentials
 - API Gateway Security Best Practices -APIsec University
 - Designing RESTful APIs - LinkedIn
 - Getting Started as a Technical Project Manager – LinkedIn
 - Managing Project Stakeholders – LinkedIn
 - Lepton NetworkAccess SmartInventory ToolTraining – Safaricom PLC
 - Professional Foundations – ALX
-

HOBBIES & INTERESTS

Traveling, Reading, Swimming, Writing, Blogging.
