🌐 LinkedIn Profile 🐙 GitHub Profile

## Professional profile

Cybersecurity professional with a strong foundation in Python development, specializing in security posture evaluation, vulnerability assessment, and incident reporting. Proven ability to leverage Python for developing secure applications and automating security tasks. Experienced in full-stack software development, contributing to robust web applications. Eager to apply comprehensive technical skills and a proactive approach to security in a challenging role focused on safeguarding digital assets and building resilient systems.

## Professional Experience

### Intern, ICT Department

*The Nairobi Hospital (TNH)*

04/2025 – Present

Nairobi, Kenya

#### Duties and responsibilities

##### 1. Website Maintenance & Optimization

- Led the redesign and continuous enhancement of The Nairobi Hospital's official website, resulting in a 20% improvement in performance and enhanced responsiveness across devices.
- Optimized web pages for faster load times and cross-device compatibility by refactoring legacy code and implementing modern frontend technologies (React and TypeScript).

##### 2. Software Development & Internal Tools

- Part of the team that designed and prototyped a lightweight internal ticketing system using JavaScript and React, streamlining IT issue reporting and reducing resolution times by 55%.
- Collaborated on the development of a patient feedback web form, integrating it with backend systems to capture critical data for quality improvement initiatives.
- Contributed to the modification of in-house applications and hospital management tools, ensuring alignment with evolving operational needs.
- Wrote clean, maintainable code following best practices, utilizing Git for version control and comprehensive documentation.

##### 3. System Support & IT Operations

- Provided critical support for hardware, software, and networking issues across hospital departments, ensuring minimal downtime for essential systems.
- Successfully supported the deployment and updating of hospital-wide enterprise applications, including the Hospital Information Management System (HMIS) and inventory tools, improving system reliability and user access.

##### 4. Collaboration & Technical Documentation

- Collaborated cross-functionally with ICT infrastructure and applications teams to gather software requirements and implement new features.
- Developed comprehensive documentation for codebases, workflows, and user manuals for internal ICT tools, significantly improving knowledge sharing and maintainability.
- Acted as a key liaison between software development and end-user support, ensuring usability and functionality of deployed solutions.

## Attaché

Kenya Ports Authority (KPA)

05/2023 – 08/2023

Nairobi, Kenya

### Duties and responsibilities

#### 1. IT Support & System Maintenance

- Provided direct technical support to KPA staff, resolving an average of 15-20 daily IT issues related to hardware, software, and network connectivity, significantly reducing user downtime.
- Assisted in the installation and configuration of over 30 new computer systems and peripherals, ensuring seamless integration into the existing network infrastructure.

#### 2. Network & Infrastructure Assistance

- Supported the maintenance of Local Area Network (LAN) and Wide Area Network (WAN) components, contributing to a 99.5% network uptime during the attachment period.
- Participated in scheduled preventive maintenance activities for critical ICT infrastructure, enhancing system reliability and performance.

#### 3. Software & Application Support

- Assisted in troubleshooting and resolving issues within port management systems and other in-house applications, improving operational continuity.
- Supported the deployment of software updates and patches across various departmental systems, ensuring compliance and security.

#### 4. Documentation & Inventory Management

- Maintained accurate inventory records for IT assets, contributing to a 10% improvement in asset tracking efficiency.
- Assisted in documenting IT procedures and common troubleshooting steps, enhancing knowledge sharing within the department.

## Education

### AWS Certified Cloud Practitioner

09/2025 – Present

AWS & Ajira Digital

- Selected from over 5,000 applicants for a rigorous, 3-month, full-time skills development program focused on AWS cloud computing, professional skills, and career development.
- Training includes hands-on labs, project-based learning, and preparation for the AWS Certified Cloud Practitioner certification.

### Bachelor of Science in Software Development

2021 – 2025

KCA University

Nairobi, Kenya

Expected graduation 28 November 2025. (Completed coursework)

## Certificates

### IBM SkillsBuild Cybersecurity Professional Certificate

[IBM SkillsBuild](#) | Issued July 2025

A comprehensive professional certificate demonstrating advanced, career-ready skills in security posture evaluation, vulnerability assessment, network architecture, cloud security, and incident reporting.

## Skills

### Programming Languages:

Python (Advanced).

### Cybersecurity:

Security Posture Evaluation, Vulnerability Assessment, Network Architecture, Cloud Security, Incident Reporting.

### Web Technologies:

React, HTML5, CSS3, Tailwind CSS, Django/Django REST Framework.

### Version Control:

Git

### Tools & Platforms:

Docker, Vite, EmailJS, Vercel

## Languages

- English
- Kiswahili

## Projects

### Portfolio [↗](#)

04/2025 – 05/2025

A cyberpunk-themed, developer portfolio built with React, TypeScript, and Tailwind CSS. Features immersive UI, project archives, resume, skills, testimonials, blog, and a secure contact form.

### Smart Campus [↗](#)

09/2024 – 04/2025

A modern, secure, network-based attendance system for educational institutions. Features QR code and network-based verification, real-time monitoring, and anti-fraud measures.

## Organisations

### Naret Olosho Community-Based Organization (CBO)

2023 – present

*Volunteer*

- **Community Engagement:** Actively participate in initiatives engaging local community members, including youth in villages like Empaash in Suswa Ward, to drive social awareness and development.
- **Advocacy Against Harmful Practices:** Support projects aimed at combating harmful practices such as female genital mutilation (FGM/C) by promoting women's empowerment and education.
- **Support for Vulnerable Groups:** Assist in programs designed to aid vulnerable populations—including the disabled, orphans, and the elderly—to improve community welfare.
- **Digital Outreach:** Contribute to the organization's social media efforts to disseminate information on community development and foster a collaborative local network.
