📍 Nairobi

SUMMARY

Detail-oriented Software Developer with a strong background in full-stack development, UI/UX design, and network infrastructure. Proficient in modern web technologies, backend frameworks, and deployment pipelines. Passionate about building scalable applications and intuitive user experiences. Seeking opportunities in frontend, backend, or full-stack roles

EXPERIENCE

UI/UX Designer

08/2023 - Present

Pullover Technologies ↗

- Design user interfaces for Pullover Android and iOS applications
- Manage and mentor 2 development interns in frontend and backend technologies
- Conduct user research and usability testing to improve product experiences for internal projects
- Collaborate with development teams to implement design solutions
- Reduced user onboarding drop-off rate by 35% through improved user flows for the app

Software engineer Intern

05/2023 - 08/2023

ICT Authority ↗

- Designed and developed the user interface for an internal memo system to streamline communication across ICTA departments.
- Configured Bitdefender on staff computers to enable secure remote work, with protection against malware and viruses.
- Monitored and managed the Bitdefender dashboard to track all connected devices, perform remote scans, and prevent malicious file execution.
- Managed the nationwide Faiba network by identifying areas with downtime, creating and assigning tickets to field technicians, tracking issue resolution, and ensuring timely updates and follow-ups on all cases.
- Key Achievement: Optimized the Faiba network layout at Utalii College, reducing cabling requirements by 40% and cutting installation costs by 30%.

IT Specialist

04/2020 - 09/2020

Eldoret Family Mart

- Managed back office system operations and maintained network connectivity between office systems
- Analyzed sales reports and provided data insights to management
- Onboarded new staff on system operations and resolved networking issues
- Troubleshoot port configurations to ensure proper front office and back office connectivity

IT Specialist

01/2020 - 04/2020

KCADOR Mentorship

- Delivered technical support for 50+ computer systems, maintaining 95% operational efficiency
- Architected and launched coding curriculum introducing HTML/CSS to 30+ students
- Facilitated technology education programs with hands-on learning approaches
- Key Achievement: Achieved 80% project completion rate among students, with all participants building functional websites

EDUCATION

Software Engineering Moringa School - Certification	02/2025 - 07/2025
Cisco Certified Ethical Hacker (CEH) USIU (CyberShujaa) - Certification	09/2024 - 12/2024
Computer Science Kabarak University - Bachelors Degree	09/2020 - 04/2024
Laboret School - KCSE	01/2016 - 12/2019

CERTIFICATES

Certified Ethical Hacker
USIU

Software engineering
Moringa School

SKILLS

Ethical Hacking	Advanced	CI/CD	Intermediate
Figma	Advanced	React	Advanced
Next JS	Advanced	Python (flask & fast API)	Advanced
