PROFILE

A passionate and adaptable Computer Science graduate with hands-on experience in building Android applications powered by machine learning, Firebase Cloud, and modern UI/UX design principles. Demonstrates a strong interest in AI, automation, and scalable systems through self-initiated projects and internship experience. Eager to contribute to platform and cloud development teams through quick learning, innovation, and collaboration.

EDUCATION

Jomo Kenyatta University of Agriculture and Technology (JKUAT)	Nairobi, Kenya
Bachelor of Science Computer Science	Sep 2021 - April 2025
Kagumo High School	Nyeri, Kenya
Kenya Certificate of Secondary Education (KCSE)	Graduated: 2020
AGP: 72	Grade: B+
<i>Relevant Subjects and Grades:</i>	
Mathematics (B+), Chemistry (B), English (B-), Kiswahili (A-), Physics (B+), Biology (B-), Business Studies (A), History and Government (A)	

EXPERIENCE

JHUB Africa	Juja, Kenya
<i>Android Development Intern</i>	May 2024 - August 2024
- Contributed to the design and development of Kazi Kazini, an Android application aimed at connecting students with potential employers - Implemented an Identity Verification feature to enhance employer confidence by enabling verified student profiles during onboarding. - Optimized app performance and load time by introducing lazy loading of images and data pagination for job listings - Utilized MVVM architecture, LiveData, and ViewModel to create a responsive, scalable codebase - Integrated Firebase Authentication and Firestore for secure login, user management, and real-time job updates - Enhanced user experience by applying Material Design principles, including smooth navigation and intuitive layouts	

SKILLS

Android Development::	MVVM, ViewModel, Live data, Navigation Component, Material Design, RecyclerView
Machine Learning / AI:	TensorFlow Lite, Gemini SDK, Firebase ML Kit
cloud / Backend:	Firebase Authentication, Firestore, Retrofit, REST APIs, Huawei Developer Console
Data Management:	ROOM Database, Retrofit, Firebase
UI/UX:	ConstraintLayout, Jetpack Components, XML Design
Version Control:	Git, GitHub
Other Tools:	MPAndroidChart, Coroutines, Huawei Developer Console
Programming Languages:	Kotlin, Java, Python

PROJECTS

Leaf Lens - Maize Disease Detection App *Kotlin, TensorFlow Lite, Gemini SDK, MVVM, CameraX, Firebase ML Kit, LiveData*
<https://github.com/isaacjayden24/LeafLens>
Leaf Lens is an Android application that detects maize diseases like blight and rust using an on-device TensorFlow Lite model. It leverages the Gemini SDK to generate intelligent agricultural treatment recommendations and Firebase ML Kit for extended offline support. Built using MVVM architecture, CameraX for live image input, and optimized for speed and usability. Demonstrates practical use of AI, cloud, and performance-aware development.

Expense Tracker App *Kotlin, ROOM, MVVM, LiveData, MPAndroidChart, RecyclerView, Material Design, Huawei Developer Console*
<https://appgallery.huawei.com/app/C113467943>
An Android application to help users record, categorize and analyze their daily expenses. It features local data storage with ROOM, dynamic UI updates using LiveData, data visualisations with charts. Published on Huawei Developer Console.

BMI Calculator App *Kotlin, MVVM (Model-View-ViewModel), LiveData, MPAndroidChart, Material Design*
<https://appgallery.huawei.com/app/C112270379>

The BMI Calculator App is an Android application that calculates Body Mass Index based on user inputs of weight, height and age, and provides personalised diet suggestions. It features interactive BMI category visualisation using MPAndroidChart and real time data updates with LiveData and ViewModel. Published on Huawei Developer Console.

NewsApp Kotlin, MVVM (*Model-View-ViewModel*), Retrofit, Room, RecyclerView, Material Design, LiveData <https://github.com/isaacjayden24/NewsApp>

The NewsApp is an Android application that fetches the latest news from the News API, allowing users to browse articles with smooth pagination and save them for offline reading. It features modern UI design with Material Design, efficient data handling using ROOM, and seamless navigation with Navigation component.

CERTIFICATIONS

Google Play Store Listing Certificate

[Google Play Academy Certificate](#)

Certified in Google Play Store Listing optimization, showcasing skills in app marketing strategy, creative asset development and global market adaptation for mobile apps and games
