PROFESSIONAL SUMMARY

Results-driven **Software Developer** with expertise in **front-end, back-end, machine learning, and DevOps**. Passionate about building scalable, high-performance applications, with experience in **React.js, Node.js, Python, AI/ML, cloud computing, and database management**. Adept at debugging, troubleshooting, and optimizing software solutions for efficiency and maintainability.

TECHNICAL SKILLS

Software Development

- **Front-End:** React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Redux, React Hooks
- **Back-End:** Node.js, Express, Python
- **Databases:** PostgreSQL, MySQL, MongoDB
- **API Development:** RESTful APIs, Authentication (JWT, OAuth)

Artificial Intelligence & Machine Learning

- **Deep Learning:** CNN, RNN, Transformers
- **ML Frameworks:** TensorFlow, Scikit-learn
- **NLP & Computer Vision:** OpenCV, Hugging Face

DevOps & Cloud Computing

- **Cloud Platforms:** AWS, Google Cloud, Microsoft Azure
- **Deployment & CI/CD:** Docker, Kubernetes, Jenkins, GitHub Actions

Other Tools & Workflows

- **Version Control:** Git, GitHub, Bitbucket
- **Development Tools:** Webpack, Babel, ESLint, Prettier
- **Agile Methodologies:** Scrum, Kanban

Soft Skills

- Strong problem-solving and debugging abilities
 - Collaboration in diverse teams
 - Leadership & effective communication
 - Adaptability and willingness to learn
-

EDUCATION

- **BSc. Computer Technology**, Meru University of Science and Technology (2019 - 2023)
 - **KCSE**, Goseta Boys High School (2015 - 2018)
 - **KCPE**, Hambale Primary School (2005 - 2014)
-

WORK EXPERIENCE

Freelance developer — *(Nov 2023 - Present)*

- Developed clean, responsive, and user-friendly web applications using **React.js, Tailwind CSS, and HTML5**.
- Integrated **front-end with back-end** services (Node.js, Express, PostgreSQL).
- Optimized application performance for **speed, scalability, and cross-device compatibility**.
- Collaborated with **DevOps teams** for CI/CD, cloud deployment, and production releases.
- Created **reusable UI components** and maintained **code consistency** through design systems.

Fireside Foundation — *Network Engineer Intern (May 2023 - November 2023)*

- Designed and implemented **network infrastructure** (routers, switches, fiber networks).
- Analyzed and mitigated **network security threats**.
- Used **network monitoring tools** to troubleshoot connectivity issues.
- Planned and executed **network upgrades** to enhance performance and reliability.

Nairobi County Government — *ICT Intern (May 2022-september 2022)*

- Assisted in **securing county ICT systems** against cyber threats.
- Developed and deployed **e-government web applications**.
- Provided **technical IT support**, troubleshooting network and hardware issues.
- Installed and configured **business software applications** for county departments.

PROJECTS

1. Credit Risk Assessment Model (AI/ML)

Objective: Predict creditworthiness using machine learning models.

Technologies: Python, Scikit-learn, TensorFlow, PostgreSQL, REST APIs **Key**

Contributions:

- Collected and preprocessed **credit-related data** to improve model accuracy.
- Built **machine learning models** (Logistic Regression, Decision Trees, Random Forests).
- Developed **RESTful APIs** for seamless integration into financial systems.
- Deployed the model for **real-time credit risk analysis**.

2. AI-Powered Recommendation System for E-Commerce

Objective: Enhance user experience by providing personalized product

recommendations. **Technologies:** Python, TensorFlow, Deep Learning (CNN/RNN), NLP

Key Contributions:

- Built a **user behavior-based recommendation engine** leveraging AI/ML techniques.
- Integrated **search history, past purchases, and user interactions** into the model.
- Achieved higher **customer engagement, retention, and sales growth**.
