PROFESSIONAL SUMMARY Intermediate Software Developer with a strong focus on the LAMP/LEMP stack (Linux, Apache/Nginx, MySQL, PHP). Proven ability to build dynamic web applications using PHP and JavaScript while managing server deployments on Ubuntu environments. Passionate about writing clean, efficient code and implementing intuitive UI/UX designs to enhance user experience.

TECHNICAL SKILLS

- **Backend Development:** PHP (Intermediate/Advanced), MySQL, MariaDB, RESTful APIs.
- **Frontend Development:** HTML5, CSS3, JavaScript (ES6+), Bootstrap/Tailwind.
- **Server & DevOps:** Linux Ubuntu (CLI, User Management, Permissions), Apache, Nginx configuration, SSH, SSL setup.
- **Tools & Design:** Git/Version Control, UI/UX Principles, VS Code.

KEY PROJECTS

Inventory Management System - <https://github.com/kabakadev/inventory-manager.git>

Full-Stack Deployment: Built and deployed a CRUD application using the LAMP stack on Ubuntu.

- **Database Architecture:** Designed a normalized MySQL schema using raw SQL to track product inventory, prices, and timestamps.
- **Security:** Implemented `mysql_i` Prepared Statements to prevent SQL Injection attacks.
- **Server Config:** Configured Apache Virtual Hosts and managed Linux file ownership/permissions for secure web serving.
- **UI/UX:** Utilized Tailwind CSS for a mobile-responsive and modern interface.

EDUCATION

- Certificate in Python and flask, Moringa School
