---

## PROFILE

Software Engineer experienced in building and integrating scalable, secure, and high-performance applications. Skilled in backend development, API design, and microservice architectures using Java, C#, and .NET Core. Proficient with Azure, CI/CD, and containerized deployments.

---

## EXPERIENCE

### Software Engineer (Consultant) – Diamond Trust Bank

 Aug 2024 – Present | Nairobi, Kenya

- Designed and integrated APIs for digital remittance systems (TerraPay, PesaLink, IFT), ensuring secure, compliant, and high-performance transactions.
- Implemented event-driven architecture using **Kafka** and **RabbitMQ**, enabling real-time communication between services.
- Utilized **Microsoft Azure (App Services, Function Apps)** for scalable cloud deployments and CI/CD via **GitLab**.
- Optimized performance using **Redis caching**, **Fiorano API Gateway**, and **containerized microservices** with **Docker** and **Kubernetes**.
- Collaborated on secure fintech systems with strict data protection and regulatory standards.

### Software Developer – E&M Technology House Limited

 2023 – Aug 2024 | Nairobi, Kenya

- Built RESTful APIs and full-stack solutions with **.NET Core**, **C#**, **Java (Spring Boot)**, and **Angular** for fintech and agricultural platforms.
- Integrated automation workflows and third-party services using **Power Automate** and other enterprise tools.
- Deployed microservices using **Docker** and **Kubernetes** to achieve scalability and fault tolerance.
- Implemented authentication and authorization with **Spring Security** and **ASP.NET Identity**.

### ICT Intern – Ministry of Interior

 May 2023 – Aug 2023 | Nairobi, Kenya

- Assisted in software implementation, IT support, and database management.
  - Supported digital transformation projects and user training initiatives.
- 

## EDUCATION

### Bachelor of Science in Computer Science – Egerton University

 Sept 2019 – July 2023

---

## SKILLS

**Languages:** C#, Java (Spring Boot), JavaScript (Angular), TypeScript

**Frameworks:** .NET Core, ASP.NET, Spring Boot

**AI/Automation:** Power Automate

**Cloud:** Microsoft Azure, AWS

**DevOps:** Docker, Kubernetes, GitLab CI/CD, GitHub Actions

**Messaging & Caching:** Kafka, RabbitMQ, Redis

**Databases:** PostgreSQL, MySQL, MongoDB, Cosmos DB (exposure)

**Monitoring:** Grafana, Prometheus

---

## KEY HIGHLIGHTS

-  Experienced in **C#**, **.NET Core**, and **Java (Spring Boot)** development in production environments
-  Experience deploying solutions on **Azure App Services** and **Function Apps**
-  Experience with **automation tools** such as Power Automate
-  Strong foundation in **microservices**, **API integration**, and **cloud-based architectures**
