SKILLS SUMMARY

- Python (Pandas, NumPy, Scikit-learn, Matplotlib, PyTorch, TensorFlow)
- SQL (Data extraction, query writing, ETL pipelines)
- Machine Learning (Supervised & Unsupervised Learning, Classification, Deep Learning)
- Data Visualization (Tableau, Python Libraries)
- Insights presentation to technical and non-technical stakeholders
- AWS Cloud Computing (SageMaker, Redshift, Amazon Bedrock, Lambda Functions, etc)
- Generative AI pipelines, RAG and chatbots
- PySpark (Big Data processing)
- Predictive Analytics (Time Series, Forecasting, Model Validation)
- Statistical analysis (hypothesis testing, Bayesian statistics, regression analysis)
- Modular analytics design, CI/CD with DBT
- Data science process orchestration with AWS Step Functions
- Web Scraping (BeautifulSoup, Scrapy, API Integration)
- Machine learning model deployment (Streamlit, Flask, MLOps)
- Data engineering (ETL processes, Redshift and Snowflake data warehousing, DBT Cloud)

SOFT SKILLS

- Data acumen, storytelling, and presentation skills
- Stakeholder collaboration and business focus
- Eagerness to Learn
- Client Interaction & Business Focus

LANGUAGE

- English 100%
- Swahili 100%

ABOUT ME

An avid data scientist with 2 years of experience in transforming complex data into strategic business solutions. Expertise in data mining, modeling, machine learning, and data visualization, with a strong focus on empowering data-driven business decisions. Experienced in developing and deploying robust machine learning models, working alongside cross-functional teams, and utilizing cloud technologies to create scalable solutions. Focused on continuous growth and dedicated to leveraging data to solve real-world challenges, improve business performance, and enhance operational efficiency.

ACHIEVEMENTS

- Winner, Wildfire Prediction Challenge (Zindi.com)** – Outperformed 87 competitors to develop a time series model that predicts wildfire occurrences in Zimbabwe with an 80% accuracy rate. [View project](#)
- Reduced Human Resource Costs by 29.15%** – Designed predictive algorithms at RI Software to identify cost-saving strategies, significantly reducing HR expenses.
- Personalized Traveller Engagement with Gen AI** – leveraged Gen AI and AWS Step Functions to send personalized messages to post-flight travellers. Achieved 19.63% CTR and 300 Loyalty Program enrolments in 3 days.
- Customer Recommender System Development** – Developed a destinations recommender model for Kenya Airways website, expected to improve conversion and customer experience.
- Optimized Shipping Algorithm** – Led the development of a shipping optimization algorithm at RI Software that reduced delivery times by 10%, improving overall customer satisfaction.
- Freelance Data Analytics Projects** – Built regression and classification models, data visualizations, and dashboards for various clients, directly contributing to business decision-making.
- Collaborative Data Projects** – Worked cross-functionally with marketing, engineering, and business teams to ensure data-driven solutions aligned with strategic business goals.
- Mentorship and Technical Blogging** – Contributed to open-source projects and wrote technical blogs, sharing insights on machine learning and data science best practices.

WORK EXPERIENCE

Data Science Trainee

Kenya Airways – Nairobi | 02/2025 – Present

- Develop and deploy a customer recommender system in collaboration with the digital marketing team, improving customer targeting and engagement.
- Collaborate with cross-functional teams including route planners, marketing, revenue, etc., to define data requirements and gather structured datasets for modeling.
- Build and validate machine learning models to optimize business processes, including predictive algorithms for customer segmentation and forecasting.
- Conduct data transformation and validation on multiple datasets, ensuring accuracy and reliability for downstream analysis. Compliance with data governance standards.
- Work on AI use cases with the digital marketing team, applying Generative AI to create personalized customer engagement and improve digital marketing efforts.
- Lead data-driven insights presentations to senior management, ensuring clarity of findings for strategic decision-making.
- Act as the safety champion for the data and analytics team, promoting safety culture and effectively communicating updates to maintain a secure work environment.

Freelance Data Scientist

Remotely | 05/2023 – Present

- Transformed business problems into actionable data solutions, delivering tailored data science projects to clients across various industries.
- Built machine learning models for regression and classification tasks, improving client decision-making through data-driven predictions.
- Designed and implemented web scraping scripts to automate data extraction from multiple sources, increasing efficiency by 30%.
- Developed interactive dashboards using Tableau and Python to visualize key business metrics, making insights more accessible to non-technical clients.
- Communicated complex data findings to clients, providing clear and actionable recommendations based on data analysis.
- Conducted A/B testing and model validation, ensuring the accuracy and robustness of machine learning models and analytical approaches.
- Collaborated with clients to define data requirements and align models with business goals, ensuring that each project delivered measurable value.

Entry-Level Data Scientist

RI Software – Remotely | 12/2023 – 02/2024

- Developed predictive models, reducing human resource costs by 29.15%.
- Led a team to optimize e-commerce order shipping, enhancing processing efficiency.
- Collaborated with backend developers to improve API response integration.
- Built and deployed data pipelines, streamlining data collection and transformation.
- Conducted EDA to uncover trends and outliers, supporting predictive modeling.
- Presented actionable data insights to stakeholders, driving business growth.

ACADEMIC HISTORY

Generative AI Professional Certification

Oracle University - Online | 10/2025

AWS Cloud Solutions Architect Certification

ALX Africa | 07/2025 – ongoing

DBT Analytics Engineering Certification

Dbt Labs, Inc | 06/2024 – ongoing

AWS Cloud Practitioner Certification

ALX Africa | 04/2025 – 06/2025

Data Science Nano Degree

Moringa School – Nairobi, Kenya | 05/2023 – 02/2024

BSc, Instrumentation and Control Engineering

Egerton University, Kenya | 09/2009 – 07/2014

REFEREES

Ms. Asha Deen - Data Science Technical Mentor

Moringa School

Email: asha.deen@moringaschool.com

Mr. Hassan Mehdi - Lead Python Developer

RI Software

Email: hassanmehdi510@gmail.com

Casey Rosengren - Client
