<https://github.com/Terryann1> | Kenya

SUMMARY

Aspiring Software Developer with a solid foundation in Python and web development. Passionate about building useful tools and solving real-world problems through code. Eager to apply skills in a collaborative and growth-oriented environment.

SKILLS

- Programming languages: Python, Javascript
- Web development: Flask, React, HTML, CSS, RESTful APIs
- Databases: PostgreSQL, SQLite3
- Tools & Technologies: Git/Github, Postman, Render
- Methodologies: Agile

Projects

Spacer - <https://spacer-platform-1.onrender.com/>

Technologies: React, Flask, Figma, PostgreSQL

Description: Spacer is a platform build to foster community and connection by enabling people with shared passions to meet, collaborate and celebrate in unique spaces. It serves as an online marketplace where users can easily find and book venues for various activities. Space owners can lease out their properties on an hour or daily basis.

Employee Management System - <https://github.com/Terryann1/Employee-management-system>

Technologies: Python, Alembic, Click, SQLAlchemy

Description: It is a CLI application where employees and their detailed information are added, updated or deleted from the system.

Bot Battle - <https://github.com/Terryann1/Bot-battle>

Technologies : React library

Description: A react application that displays bots among other features.

E-commerce Cart - <https://github.com/Terryann1/E-commerce-cart>

Technologies : React Library

Description: This app allows users to browse a list of products, add them to cart, modify cart contents and view total price.

EXPERIENCE

No prior experience as a software developer since I have currently finished school.

EDUCATION

Masinde Muliro University of Science and Technology | Bachelor of Science in Information Technology

- Second class upper division

Relevant Coursework:

- Software Project Management
- Systems Analysis and Design
- Computer Networks
- Network Administration
- Database Systems
- Object Oriented Programming
- Web Development

Moringa School | Software Engineering

- Software Engineering Bootcamp(Awaiting graduation-11th July 2025)

Relevant Coursework:

- Frontend development(HTML, CSS, Javascript, React)

- Backend development(Python,Flask,PostgreSQL,SQLite3)
- Version control with Git and Github
- Agile methodologies
- Test Driven Development
- RESTful API design
- Deployment
- Capstone Project Development

Volunteer Experience

- **HealthIT MMUST Club:** Technical Lead

Referees

- **Nancy Umutohiwase**
Technical Mentor, Moringa School
