COMPETENCIES

- IT Support (L1 & L2) & Help Desk Operations
- Googleworkspace (Users, MFA, Access Control)
- Endpoint Security (Cortex XDR)
- SIEM & Log Monitoring (Wazuh)
- Network security infrastructure
- Network Monitoring & Troubleshooting
- Firewall Management (FortiGate)
- User Onboarding & Offboarding
- System & Device Configuration
- Risk Management & Security Awareness
- Incident & SLA Management
- Disaster Recovery & Business Continuity Support

Professional summary

Results-driven IT Support & Cybersecurity Specialist with 3+ years of experience delivering end-user support, system administration, and security operations across multi-region environments (Kenya, Rwanda, India, London). Skilled in Microsoft 365 administration, endpoint security, SIEM monitoring, and network troubleshooting. Proven ability to enhance system performance, strengthen security posture, and provide responsive, user-focused IT support.

Professional experience

1. Cybersecurity analyst October 2024 - February 2026

KOKO Networks

- Provided first- and second-line technical support across multi-region teams (Kenya, Rwanda, India, London), resolving hardware, software, network, and access issues.
- Supported enterprise network infrastructure including firewalls, routing, switching, and hybrid cloud environments.
- Configured and managed FortiGate and Palo Alto firewall policies, VPNs, and access controls to enhance network security posture.
- Managed and enforced endpoint security controls using Cortex XDR, enhancing threat detection and response capabilities.

- Led risk identification and mitigation initiatives in alignment with the NIST CSF, significantly improving system resilience and overall security posture.
- Led phishing simulations and security awareness campaigns, achieving 80%+ employee completion and measurable improvement in threat detection.
- Collaborated with vendors and internal stakeholders on infrastructure upgrades and network improvements.

2. ICT Technician January 2022 - October 2024

KOKO Networks

- Supported device setup, configuration, and deployment, ensuring compliance with organizational standards.
- Performed user onboarding and offboarding, ensuring secure access management and timely deprovisioning.
- Deployed automated phishing reporting in Google Workspace, accelerating incident response.
- Led Palo Alto XDR migration, enhancing endpoint detection and response capability by 40%. Key Achievements:
- Strengthened cyber maturity via automated phishing reporting and structured awareness campaigns

3. ICT Assistant January 2021 - December 2021 **Mas holdings EPZA**

- Provided Tier 2 network troubleshooting support across LAN/WAN environments.
- Managed user access controls, network connectivity issues, and infrastructure configurations.
- Assisted in hardware upgrades, firmware updates, and migration activities..
- Documented network changes, configurations, and incident resolutions in line with governance standards.

Academic qualifications

- Bachelor's degree computer science and mathematics |Kenyatta University
- Certificates | CCNA
