

Antonny Muiko

Data Analytics Engineer

+254796867838 | [Email](#) | [LinkedIn](#) | [GitHub](#)

As a Data Analytics Engineer, I design and implement data solutions that transform raw information into actionable insights. With expertise in business intelligence, data engineering, and analytics, I build scalable pipelines, interactive dashboards, and automated reporting systems that empower organizations to make data-driven decisions. Skilled in Python, SQL, and cloud platforms, I integrate data from diverse sources into unified systems, ensuring accuracy, accessibility, and performance. Passionate about enabling teams with data, I specialize in delivering analytics tools that improve operations, strategy, and growth.

Technical Skills

- **Programming Languages:** Python, SQL
 - **Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn
 - **Machine Learning Frameworks:** TensorFlow, Scikit Learn, Keras, FastAI
 - **Databases:** MySQL, MongoDB, PostgreSQL
 - **Cloud Platforms:** AWS, Google Cloud, Azure
 - **Data Pipelines:** Apache Airflow, Luigi, ddb
 - **Model Deployment:** Flask, Docker, FastAPI
 - **Big Data Technologies:** Apache Spark
-

Professional Experience

Business Intelligence Analyst

Feb 2025 - Present

[Moringa School](#) | **Nairobi.** (*Moringa School is a coding and data science boot camp focused on equipping students with the skills needed for the tech industry through practical training and mentorship*)

- Built Moringa BI, an internal analytics tool using Python and Plotly to create dashboards and interactive
- Developed and maintained APIs to collect and unify data from Salesforce, Canvas, and other sources into a centralized PostgreSQL database, ensuring consistent and accurate reporting.
- Designed custom Salesforce dashboards and reports for sales, operations, and leadership teams, driving better decision-making across departments.
- Automated reporting workflows, reducing manual data preparation and enabling faster access to real-time insights.

Senior Technical Mentor Data Science

June 2022 - Jan 2025

[Moringa School](#) | **Nairobi.**

- Spearheaded the analysis of student engagement trends using Salesforce data, leading to a 45% increase in student retention rates through data-driven strategies.
- Designed and deployed a sentiment analysis model to process student feedback, enabling curriculum improvements that increased student satisfaction by 67%.
- Developed interactive dashboards using Salesforce to visualize KPIs, enhancing data-driven decision-making for leadership.

- Conducted training sessions on data analytics upskilling 50+ team members and fostering a data-driven culture within the organization.

Technical Mentor Data Science

March 2021 - May 2022

[Moringa School](#) | Nairobi.

- Mentored 100+ students in data analytics and machine learning, achieving a 90% project completion rate and improving mastery of key concepts.
- Evaluated and provided feedback on student projects, ensuring adherence to industry best practices and effective application of data science techniques.
- Analyzed student performance data to identify gaps, leading to curriculum enhancements that improved student retention by 48%.
- Guided students through real-world projects, enabling them to apply data science skills to industry-relevant problems.

Data Scientist

Jan 2020 - Feb 2021

ConfluxAI | Nairobi. (*ConfluxAI is a data analytics company that provides actionable insights and solutions while also offering a hands-on boot camp to train aspiring data professionals in data science and machine learning.*)

- Collaborated with the United Nations to implement Natural Language Processing (NLP) solutions, enhancing operational effectiveness in societal contexts.
- Mentored 50+ boot camp scholars, providing technical support and guidance on data science projects, resulting in a 95% success rate for project completions.
- Partnered with Blue Whale (US-based) to develop a compiler that converts SaaS applications to Python, reducing development time by 75%.

Education

Jomo Kenyatta University of Agriculture and Technology

Nairobi, Kenya

Bachelor of Science, Information Technology

Graduation: December 2024

Relevant Coursework: Programming Fundamentals, Data Structures & Algorithms, Database Systems, Artificial Intelligence & Machine Learning, System Analysis & Design, Cloud Computing, Business Intelligence, Object Oriented Programming

Certifications

Foundations of Generative AI

Feb 2025

- **Issuing Organization:** Udacity
- **Description:** Introduces generative AI, exploring its principles, popular models, and their development using tools like PyTorch and Hugging Face. It covers customizing pre-trained models for specific tasks and includes a project applying parameter-efficient fine-tuning (PEFT) to adapt large models with minimal computational resources.

Statistics for Data Science

Nov 2024

- **Issuing Organization:** 365 Data Science
- **Description:** Covered descriptive and inferential statistics, confidence intervals, and hypothesis testing.

Data Science Professional Certificate

Dec 2019

- **Issuing Organization:** 365 Data Science
- **Description:** Comprehensive training in data analysis, statistics, data visualization, and machine learning co-developed and certified by Dalberg Data Insights.
