Professional Summary

Configuration (Data) Analyst with a focus on Data Science and Automation, specializing in the end-to-end lifecycle of data - from SQL-driven ETL processes and JavaScript automation to advanced Power BI visualization. Enhancing organizational efficiency by building AI-ready data pipelines, optimizing UI/UX for legal compliance, and delivering predictive insights that drive decision-making.

Technologies

- SQL, Power BI, Data Science, Python, JavaScript, Crystal Reports, SQL Server Reporting Services (SSRS), Lighthouse

Work Experience

Configuration (Data) Analyst BQI Technologies

April 2025 – To Date

Technical Responsibilities

- Ensuring data integrity for downstream predictive modeling and statistical analysis, using SQL, to architect queries for data wrangling and preprocessing.
- Enabling strategic planning and resource allocation by engineering interactive Power BI dashboards for effective monitoring and management of data.
- Increasing operational efficiency and reduced manual intervention by developing JavaScript-based automation scripts.
- Ensuring adherence to global standards (WCAG) and optimization of user experience through conducting rigorous accessibility audits and compliance testing using automated tools.
- Proactively resolving compliance issues before deployment by integrating AI-driven validation techniques to identify anomalies in site configurations.

Administrator Swim Africa Ltd

September 2022– December 2024

Operational Responsibilities

- Enhanced inventory management by identifying and addressing data inconsistencies and errors. This enabled informed decision-making on stock levels and procurement.

- Meticulously recorded and managed monthly sales data, illuminating areas of improvement and increasing returns.
- Streamlined workflows resulting in improved project timelines and team productivity.
- Effectively communicated with clients by sending emails and offering prompt responses to calls and texts, consequently increasing customer satisfaction.
- Managed and analyzed client footfall, enabling proper distribution of labor during high and low peak seasons.
- Cultivated a positive and productive team environment through providing constructive feedback, leading to enhanced team collaboration.

Technical Responsibilities:

- Developed a database using SQL for effective monitoring and management of clients, resulting in high client retention.
- Developed an Excel-based reporting system for Termly Swimming Reports, improving accuracy and eliminating manual data entry errors.
- Used clients' feedback to inform necessary improvements and adjustments to the customer relations site and services.
- Researched marketing strategies for increased footfall and seasonal offers for client retention.

IT Graduate Intern Kenobi Group

October 2021 – December 2021

- Collected data for a Business Intelligence project.
- Developed and Implemented monthly goals.

Education

Bsc Mathematics and Computer Science

September 2018 – August 2022

Jomo Kenyatta University of Agriculture and Technology
Second Class Upper Division

- Mathematics, Basic finance and accounting, Statistics, System analysis and design, Database systems, Simulations and modeling, Software engineering, Computer systems, Networks and programming.

Kenya Certificate of Secondary School Education

February 2014 – November 2017

Bunyore Girls' High School
Grade: B+

Training and Certifications

Python for Data Science

January 2025 – April 2025

Martial School of IT

- Python, Machine learning, Deep learning, Mathematical modeling

Soft Skills

Continuous learning, Communication, Collaboration, Critical thinking, Problem-solving.
