SUMMARY

Experienced software engineer with 3+ years in application support and production management. Proficient in installation, configuration, and troubleshooting of enterprise applications, focusing on API integration and system monitoring. Demonstrated success in increasing system uptime and addressing production issues, leading to enhanced user satisfaction. Effective communicator with cross-functional teams and vendors to facilitate smooth business processes.

SKILLS

- Application installation and configuration
- System monitoring and optimization
- Application support (L1/L2)
- API integration and troubleshooting
- System testing and UAT
- Release management and deployment
- IOT design and deployment
- Incident management and analysis
- Patch management and upgrades
- End-user support and training
- Documentation and SOP development
- SQL and database support
- DevOps and CI/CD automation

EXPERIENCE

System Analyst (DevOps & Process Improvement)

Kimipay Company | Remote | May 2023 - Current

- Ensured high system availability by maintaining live financial applications with minimal downtime.
- Proactively identified issues while configuring and monitoring software across various environments.
- Delivered timely front-end and back-end application support, performing root cause analysis on incidents.
- Worked with development teams on UAT deployments to enhance integration processes and overall system efficiency.

System Developer (Systems & Innovation)

ICT Authority | Nairobi, Kenya | Jan 2025-Dec 2025

- Configured and deployed digital applications, ensuring seamless user experience and system reliability.
- Proactively monitored application performance and system health, implementing enhancements for optimal functionality.

- Defined use cases for system testing and user acceptance testing to validate production readiness.
- Provided comprehensive application support, maintaining documentation and addressing user inquiries effectively.

System Analyst – Systems Integration

Kenya Revenue Authority | Nairobi, Kenya | Jan 2023-Dec 2024

- Supported and maintained enterprise financial systems with 70+ integrations, ensuring 99% uptime in production.
- Monitored API integration pipelines and transaction flows, reducing downtime by 30% through early failure detection.
- Performed root cause analysis and troubleshooting to resolve application and integration errors within SLA timelines.
- Provided end-to-end application support for internal and external users, decreasing recurring support tickets.
- Collaborated with developers, vendors, and cross-functional teams to facilitate system testing, deployments, and enhancements.

EDUCATION AND TRAINING

Bachelor of Science: Software Engineering

Muranga University of Technology | Kenya | November 2022

CERTIFICATIONS & LICENSES

AWS Certified Cloud Practitioner - Emobilis, 2024.

ALX Software Engineering Program, 2023–2024.

Alison Business Analysis: Process Modeling Certification

Google Android Development Certificate, 2021–2022

NDG Linux Essentials 2022

PROJECT HIGHLIGHT

- AI Chatbot Implementation: Led requirements gathering, workflow design, and UAT validation for an AI-driven user support system
- Enterprise System Integrations (KRA): Supported 70+ integrations through requirement analysis, testing, and documentation
- Process Optimization: Improved system workflows and reduced operational inefficiencies across multiple platforms
- Testing & QA Support: Contributed to structured UAT cycles, improving system reliability and reducing defects
