

Wairimu Kimani

Data Scientist | Machine Learning Engineer

Pwairimu046@gmail.com [Github](#) [LinkedIn](#) +254 759219023 Kenya

SUMMARY

Experienced Data Scientist & ML Engineer with over 4 years of expertise delivering impactful analytics, machine learning, and data solutions across diverse industries. Skilled in building scalable data pipelines, architecting analytics platforms, and developing AI-powered products. Dedicated mentor and passionate about using data to solve real-world challenges, enhance operational efficiency, and support strategic decision-making across sectors.

SKILLS

Soft Skills | Communication, Time Management, Project Management, Collaboration, Adaptability, Problem-solving
Technical Skills & Tools | Python, AWS (Redshift, Athena, S3) SQL, Scikit-learn, NLP, AB Testing, Power Bi, Docker, Excel, Jira, TensorFlow, LLMs (Claude, ChatGPT), API Development

EXPERIENCE

Data Scientist Aug 2024 - Present
Pngme

Machine Learning and Predictive Modeling:

- Designed, implemented, and evaluated machine learning models-xgboost, random forest and linear regression to predict customer behavior, identify credit risks, and optimize business strategies.
- Continuously enhanced models by incorporating new features, improving algorithms, and fine-tuning hyperparameters.
- Developed, tested, and deployed chat bots using Claude in AWS for summarizing text with inbuilt prompts deployed to dashboard.
- Conducted data discovery and validation to address quality issues; implemented best practices in data governance, privacy, and security for sensitive financial data

Data Engineering and Automation

- Built and automated end-to-end data pipelines for structured and unstructured sources using AWS (Redshift, S3) and Docker, ensuring reliability and reproducibility
- Developed and optimized complex SQL queries for data staging, transformation, and reporting, improving query performance and ensuring alignment with business requirements.
- Monitored system logs and pipeline health, identified performance bottlenecks, and implemented solutions to ensure high data availability and accuracy
- Deployed APIs for internal tools and ensured automated testing frameworks were in place.
- Designed and optimized star and snowflake schemas in Amazon Redshift.

Visualization and Reporting:

- Performed advanced statistical and exploratory analysis on large datasets (10M+ rows) using NLP to identify trends, anomalies, and business opportunities
- Developed, tested, and deployed **AI-powered chatbots** (Claude, AWS) to summarize text and deliver insights on dashboards.

Data Scientist Jan 2022 - Aug 2024
Seven Skies Information & Research Nairobi, Kenya

- Took part in cleaning, and preprocessing structured and unstructured datasets for building models.
- Conducted exploratory data analysis (EDA) to identify trends, patterns, and insights.
- Supported the development of predictive models and machine learning algorithms using VECM and other Time Series models.
- Created interactive automated dashboards and visualizations to communicate findings from the predictions.
- Collaborated with cross-functional teams especially partners to understand research needs and deliver data-driven solutions.
- Assisted in writing technical reports, research papers, and presentations for the stakeholders.

EDUCATION

Kabarak University 2023
Bachelor of Science, Economics & Statistics
Coursework: *Object Oriented Programming, Statistical Softwares – STATA, SPSS, Data Structures and Ab testing , Econometrics, Excel, R, Statistical Analysis, Hypothesis testing*

Moringa School
Data Science Nanodegree
Core competencies: *HTML, CSS, Python, TensorFlow, MySQL, AWS, Database design, Power Bi, NLP and Machine learning*
