Professional Summary

Full-Stack Software Engineer with 2+ years of experience specializing in .NET, Node.js, and modern JavaScript frameworks including Angular and React. Proven expertise in designing and implementing scalable RESTful APIs, microservices, and responsive front-end interfaces that drive user engagement and system performance. Skilled in C#, TypeScript, JavaScript, and Python, with solid experience in cloud platforms, DevOps practices, automated testing, and CI/CD pipelines. Bilingual in Arabic and English, with experience in fintech and microservices architectures. Adept at collaborating across teams to deliver high-quality, maintainable software solutions in fast-paced environments.

Work Experience

Software Engineer – Optimum Computer Systems Ltd Jan 2024 – Present | Nairobi, Kenya

- Collaborated with a cross-functional engineering team to design and build a project management dashboard for the President's Award Kenya, tracking over 20,000 participants and revamping an outdated system to improve project tracking and reporting efficiency.
- Implemented responsive and accessible UI/UX using modern frameworks, delivering a seamless user experience that increased user adoption by 35% and engagement time by 20%.
- Conducted comprehensive testing, debugging, and code reviews, reducing defect leakage by 30% and cutting release cycle time by 5 days to ensure high-quality, maintainable software aligned with industry best practices.
- Introduced real-time progress monitoring and automated reporting features, enabling stakeholders to make data-driven decisions and reducing manual reporting time by 40%.
- Technologies used: .NET Core, C#, Node.js, Angular, React, SQL Server, Azure, Docker, Git.

Software Engineer – Farsight Africa Group January 2023 – January 2024 | Nairobi, Kenya

- Established consistent structural input formats to maintain site continuity by authoring and implementing best practices for designers and content providers.
- Tested and debugged site updates, preventing functional flaws and ensuring seamless visitor experience.
- Monitored compliance with regulated accessibility standards, enhancing site usability.
- Troubleshoot website issues and fixed scripting errors promptly.
- Configured and purchased domains to support website deployment.
- Backed up and modified applications and related data to ensure disaster recovery readiness.
- Collaborated with art directors to create dynamic, engaging websites.
- Technologies used: Node.js, Express, MongoDB, JavaScript, Git, Jira.

Education

Moringa School – Nairobi, Kenya June 2022 - March 2023

Software Engineering

Main coursework: Database Systems, Operating Systems, Software Engineering.

South Eastern Kenya University – Kitui Sept 2018- Dec 2023

B.Sc. Computer Science

Main coursework: Data Structures, Design and Analysis of Algorithms, Computer Architecture, Artificial Intelligence, Database Systems, Operating Systems, Software Engineering.

Skills

- Programming Languages:** C#, Java, JavaScript, TypeScript, Node.js, Python, C++ (basic)
Operating System: Linux, Windows, Mac OS, Android
Database: SQL, MySQL, MongoDB, PostgreSQL
Frameworks and tools: .NET / ASP.NET Core, Angular, Spring, Express, React, NestJS, Docker, Kubernetes
Others: GitHub, Jira, Apache, Nginx, Redis, CI/CD pipelines, Mocha, Jest
