SUMMARY

Junior Developer skilled in React.js, JavaScript, Python Flask, and Tailwind CSS, with a strong foundation in web development and data analytics. Proficient in building responsive, user-friendly applications, debugging code, and leveraging tools like Excel and Python for data analysis. Passionate about solving problems and delivering impactful solutions in agile environments.

SKILLS

- HTML
- Cascading Style Sheets
- Tailwind CSS
- JavaScript
- React.js
- Python
- Python Flask
- SQL
- Code Debugging
- Web design with figma and canva

Projects

Amwell Website - <https://am-well.vercel.app/> A platform for doctors to manage patient information online. Built using React.js and Tailwind CSS.

News Website - <https://news-classroom-weld.vercel.app/> A site that displays and filters news into various categories. Developed with React.js and Tailwind CSS.

Meme Generator - <https://make-memes.vercel.app/> A tool for generating memes using JavaScript, HTML, and CSS.

Event-Hive Application

An application for creating, managing, and scheduling events. Contributed to both backend and frontend development.

Movie Watchlist CLI Project

A command-line interface for managing movies, including creating, deleting, and reviewing movies. Developed using Python.

Loan Website Admin Dashboard - <https://admin-panel-five-psi.vercel.app/> An admin dashboard for a loan website to manage loans. Contributed to the development of features for loan management and administration.

EXPERIENCE

Web Developer Intern | Zidio

August 2024 – November 2024 | Nairobi, Kenya

- Developed and optimized user-friendly interfaces for a job scout platform using React.js and Tailwind CSS.
- Implemented responsive design techniques to ensure seamless performance across various devices.
- Collaborated with cross-functional teams to integrate APIs and enhance functionality.
- Resolved bugs and improved application performance, reducing load times by 20%.
- Assisted in backend API testing and debugging, ensuring smooth data flow between frontend and backend.

Key Accomplishments:

- Successfully enhanced the job search feature, increasing user satisfaction by 30%.
- Delivered the project within the deadline, adhering to best coding practices and agile methodologies.
-

EDUCATION

Multimedia University of Kenya | Bachelor of Science in Information Technology

August 28, 2024 – Present

Programming: proficiency in languages like Java, Python, and C, developing problem-solving and coding skills.

Software Development: best practices for software design, development, testing, and deployment.

Web Development: experience with HTML, CSS, JavaScript, and frameworks such as React.js for building responsive websites.

Database Management: database design, SQL queries, and how to manage and analyze data using relational databases like MySQL.

Networking & Security: Developed an understanding of networking protocols, cybersecurity practices, and network administration.

Project Management: Gained experience with Agile methodologies, teamwork, and collaborative tools like Jira and Trello to manage projects effectively.

Data Analysis: data analytics techniques and tools, including Excel and Python, to solve real-world problems and analyze large datasets.

Nairobi, Kenya Moringa School

Feb 2022- Aug 2024

- **Software Engineering**

- Main coursework: Database Systems, Operating Systems, Software Engineering, web design, soft skills
