IT Operations Engineer | Help Desk & SaaS Operations | macOS & Windows Specialist
Nairobi, Kenya • +254 791 937 752 • jeellnandaha@gmail.com • linkedin.com/in/jill-nandaha-82575521

PROFESSIONAL SUMMARY

IT Support professional with 3+ years of experience resolving hardware, software, and network issues in fast-paced, multi-department environments. Proven track record handling 20–30+ weekly help desk requests with a 99% user satisfaction rate. Skilled in Windows and macOS support, user provisioning, SaaS administration, and preventive maintenance. Passionate about keeping people productive, documenting solutions, and continuously improving IT processes to support business operations.

KEY COMPETENCIES

- Help Desk Ticketing: Daily use of ticketing systems to log, track, and resolve 20–30+ incidents weekly
- Hardware & Software Troubleshooting: End-to-end diagnostics on laptops, peripherals, printers, and enterprise apps across macOS, Windows, and Linux
- Onboarding Support: Full lifecycle — account creation, workstation imaging, access provisioning, and end-user training
- Preventive Maintenance: Reduced system downtime by 25% through scheduled maintenance and proactive issue detection
- IT Policy & Compliance: Documented SOPs, enforced access controls, and maintained security best practices
- Asset & Inventory Management: Tracked hardware assets and maintained accurate records in Oracle-based and ERP systems
- Network Fundamentals: Hands-on TCP/IP, DNS, DHCP, and WLAN troubleshooting
- Process Improvement: Automated manual processes with Python scripts — cutting operational workload by 40%

PROFESSIONAL EXPERIENCE

IT Graduate Associate | Hotpoint Appliances Ltd — Nairobi

March 2025 – Present

- Serve as first-line IT support across multiple departments, resolving 20–30+ requests weekly via help desk ticketing with a 99% user satisfaction rate
- Diagnose and resolve hardware, software, and network issues on macOS, Windows, and Linux systems including laptops, peripherals, and printers
- Lead end-user onboarding and offboarding: account creation, access provisioning, workstation setup, and user training on IT best practices and security policies
- Conduct periodic backups and preventive maintenance on computers and network devices to ensure optimal performance and prevent failures
- Support enterprise SaaS platforms (ERP, POS, email, collaboration tools) — minimizing downtime and ensuring business continuity
- Developed Python automation scripts that reduced manual asset and system processes by 40%, improving efficiency and freeing up IT bandwidth
- Identified recurring issues, documented root causes, and implemented fixes that improved system reliability by 15%
- Maintain comprehensive technical documentation: SOPs, troubleshooting guides, and onboarding procedures
- Escalate complex issues appropriately while keeping users informed and minimizing disruption to productivity

Network Intern | Safaricom PLC — Nairobi

Nov 2023 – May 2024

- Monitored large-scale network infrastructure using Huawei iMaster, responding to 10+ incidents weekly and ensuring uptime across geographically distributed sites
- Performed diagnostics on cabling, wireless coverage, IP connectivity, and network devices — building strong hands-on networking fundamentals

- Maintained accurate technical documentation and asset records in Oracle-based systems
- Supported site implementations and network upgrades, contributing to measurable improvements in performance and stability

Computer Technician | Techbiz Ltd —

Jan 2023 – Jun 2023

- Delivered hands-on technical support for 20+ users — hardware repair, OS installations, patching, and software deployment
- Reduced system downtime by 25% through preventive maintenance and proactive troubleshooting
- Supported VoIP systems, conference setups, and remote meeting tools — improving reliability and user experience

Telecommunications Intern | JKUAT Industrial Park —

Jul 2022 – Oct 2022

- Supported daily IT and network operations, contributing to a 20% reduction in downtime
- Installed structured cabling, configured end-user devices, and assisted with VoIP system support

TECHNICAL SKILLS

- Operating Systems: macOS, Windows 10/11, Linux (Ubuntu, CentOS) — daily support experience
- Hardware: Laptop repair & imaging, peripherals, displays, printers, PC & Apple diagnostics
- Networking: TCP/IP, DNS, DHCP, WLAN troubleshooting, LAN setup, routing & switching fundamentals
- Identity & Access Management: Active Directory, Office 365 Admin, Google Workspace
- SaaS Platforms: ERP, POS, helpdesk ticketing systems, remote support tools
- Automation & Scripting: Python (IT automation), Google Apps Script, SQL (basic queries & reporting)
- Documentation: SOP creation, troubleshooting guides, IT policy support

EDUCATION & CERTIFICATIONS

BSc. Telecommunication & Information Technology — Kenyatta University, 2022

- CCNA Training — Routing & Switching Fundamentals
- Microsoft Technologies & IT Troubleshooting (Ongoing)
- ERP & POS Systems Support
- Python Automation Projects

KEY ACHIEVEMENTS

- 30+ IT incidents resolved weekly with 99% user satisfaction
- 40% reduction in operational workload through Python automation
- 25% improvement in system uptime via preventive maintenance programs
- 15% increase in system reliability through proactive issue analysis and documentation
- Supported network operations across distributed sites at one of East Africa's largest telcos
