PROFESSIONAL PROFILE

I am a dedicated and adaptable IT professional with a solid foundation in IT support, network administration, and a growing focus on cybersecurity. Skilled in troubleshooting hardware and software issues, optimizing network infrastructures, and ensuring seamless IT operations. Proficient in managing systems like Microsoft 365 and endpoint security tools. Currently advancing cybersecurity expertise through ongoing training and certifications, with a focus on safeguarding systems against emerging threats. Known for problem-solving skills, a proactive learning mindset, and effective collaboration, I am committed to delivering reliable IT support and implementing best practices in technology and security.

TECHNICAL SKILLS

IT Support | System Administration | Website Management | Cybersecurity | Firewall configuration | Graphic design | Hardware maintenance | IT support | Networking and Infrastructure

PROFESSIONAL EXPERIENCE

ICT ASSISTANT |ACTING ICT OFFICER | CORAT Africa | Karen, Nairobi Feb 2022 – Oct 2025

ICT OFFICER | CORAT Africa | Karen, Nairobi Nov 2025 - Present

- Managing and optimizing computer networks for enhanced reliability and performance.
- Proficient in maintaining an up-to-date inventory of ICT assets and providing frontline technical support to end-users.
- Skilled in troubleshooting hardware and software issues, installing/upgrading software, and responding to network access needs.
- Adept at setting up and managing video conferencing facilities (Zoom, Microsoft Teams, Google Meet) and troubleshooting peripheral devices such as printers and scanners.
- Monitoring internet usage through PfSense firewall and implementing diverse Wi-Fi login credentials for distinct clients.
- Assist the digital Marketing officer with event photography and website management i.e. revamping it to meet international standards and updating it periodically.
- Managing and operating the Biometric systems and CCTV monitoring systems.
- Set up and configure user accounts and assign security levels.
- Experienced in providing audio-visual support for events and hybrid/video conference setups.
- Additionally, I act as a user liaison for the ICT Department, addressing and resolving problems while collaborating with the digital marketing department in graphic design creation.
- Act as a user liaison, communicating with users to resolve problems and concerns.
- Configuring and managing online registration system for events, including handling attendee communications and payment coordination.

- Overseeing the implementation and maintenance of an abstract submission platform integrated with the event website.
- Prepare detailed reports on recent ICT projects, providing updates on the current state of ICT infrastructure, and offer well-researched recommendations for new projects and advancements in line with emerging technological trends.
- Assisting in ensuring that the institution is cyber secure by monitoring and mitigating cyber threats and support the development and enforcement of ICT policies, procedures, and best practices within the organization.
- Continuous monitoring and maintenance to ensure integrity and availability of all ICT systems including, network, internet, applications, and servers.
- Organize Staff Cybersecurity Awareness training.
- Ensure regular system and data backups are performed and that recovery procedures are in place in case of system failures or data loss.

DATACENTER ATTACHEE | Dimension Data | The Chancery, Valley Road Nairobi Jun 2019 – Dec 2019

- Inspecting and Optimizing power and cooling systems, ensuring the seamless operation of Servers in the data center environment.
- Troubleshooting network systems, monitoring IT solutions and administering maintenance for servers, hard drives and associated equipment.
- Maintain HVAC and electrical systems to create optimal conditions within the server room.
- Installing, maintain routers, firewalls and virtual private networks.
- Conducting repairs on physical structures housing data center equipment and responding to server reboot requests from clients.
- Record keeping, documenting server temperatures, HVAC conditions and power supply details daily.
- Collaborate effectively with departmental heads to develop and implement strategies for enhancing data center operations.
- Respond to server-related incidents and escalate issues to senior IT staff when necessary.
- Support the integration of new technologies within the data center.
- Participate in hands-on training to gain practical knowledge of data center operations and stay updated on emerging technologies and best practices in data center management.
