PROFESSIONAL SUMMARY

IT professional with over 7 years of experience in IT operations, system administration, and cloud services. Recently completed software testing training with PLP Academy, where I gained skills in writing test cases, using JIRA, bug tracking, and regression testing. Also trained in DevSecOps, with a focus on secure development and automation practices. Certified in AWS Cloud. Looking for a QA role to apply my knowledge in testing and support quality systems.

EDUCATION

BSc. Information Technology | Jomo Kenyatta University of Agriculture & Technology | 2004

Diploma in Information Technology | Jomo Kenyatta University of Agriculture & Technology | Dec 2000

SKILLS

Manual Testing, Functional Testing, Regression Testing, Test Planning & Bug Reporting, Test Case Design, Defect Tracking, SDLC, Agile & Scrum Methodologies, DevSecOps Practices, Security-Aware Testing, CI/CD Integration, Application Support (Level 1 & 2), IT Troubleshooting, Service Delivery, Incident Management, SLA Management, Documentation, Data Analysis, System Administration, Networking, Cloud Security, Process Improvement, Root Cause Analysis, Identity & Configuration Management, Database Administration, Data Migration, COB Operations & MIS Reporting, Core Banking & Payment Systems.

EXPERIENCE

Educational Break | Aug 2023 - July 2025

Took a strategic career break to strengthen end-to-end IT competencies, with a focus on becoming a well-rounded professional capable of delivering sustained value and supporting long-term organizational goals.

Technology Banking Operations Manager

Kenya Commercial Bank Group | Nairobi, Kenya | Jan 2023 – Aug 2023

Roles and Responsibilities:

- Spearheaded ETL optimization projects, achieving a 99.7% uptime for critical financial systems.
- Automated COB processing, reducing processing time by 13%, significantly improving operational efficiency.
- Standardized IT operations across four countries, resulting in streamlined processes and improved cross-border collaboration.
- Generated weekly system uptime and transaction performance reports.
- Collaborated with ATM custodians and L1 support engineers to resolve errors.
- Partnered with virtual teams to deploy a new financial application system, delivering the project two weeks ahead of schedule.
- Improved troubleshooting protocols, enabling the resolution of high-priority incidents within an average of 4 hours.

Desktop Applications Specialist

Kenya Commercial Bank Group | Nairobi, Kenya | Aug 2018 – Dec 2022

Roles and Responsibilities:

- Provided Level 1 and 2 support for enterprise applications

- Managed daily monitoring of IT systems ensuring 99.7% uptime.
- Designed and implemented virtual training programs that reached over 200 users, leading to a 27% decrease in help desk inquiries and significantly improving user proficiency.
- Strengthened identity and access management (IAM) protocols by enforcing stringent security measures, which led to a 12% reduction in vulnerabilities identified during regular audits.
- Worked closely with cloud service providers to optimize application configurations, resulting in an 18% improvement in load times for critical business applications.
- Used monitoring tools to analyze load times and optimize application performance.

Manager, Service Desk Level 2 Support

Kenya Commercial Bank Group | Nairobi, Kenya | Jan 2017 – Jul 2018

Roles and Responsibilities:

- Introduced RCA framework that reduced repeat incidents by 23%.
- Led a 6-member service desk team ensuring SLA compliance.
- Created escalation workflows for ATM outages and high-priority issues.

Service Desk Analyst

Kenya Commercial Bank Group | Nairobi, Kenya | Sept 2015 – Dec 2016

Roles and Responsibilities:

- Logged, tracked, and resolved ATM and IT-related issues.
- Maintained 98% SLA adherence in service desk responses.
- Collaborated with team members to streamline processes, achieving a 19% reduction in ticket resolution times, which significantly enhanced overall user experience.

Customer Relationship Manager

Kenya Commercial Bank Group | Nairobi, Kenya

Sept 2015 – Dec 2016

Roles and Responsibilities:

- Spearheaded the adoption of cloud-based solutions, driving a 20% growth in the customer portfolio.
- Designed and implemented digital transformation strategies, elevating client retention and satisfaction through innovative cloud services.
- Enhanced customer engagement by leveraging data-driven insights to tailor banking solutions to client needs.
- Collaborated with cross-functional teams to streamline customer onboarding processes, reducing turnaround time by 30%.

Selenium, Postman, Cypress, Jest, AWS CLI, Amazon S3, Amazon EC2, IAM, CloudFormation, CloudWatch • Containers & CI/CD (Beneficial): Docker, Jenkins, Ansible, Kubernetes, GitLab CI, GitHub Actions • Trivy, SonarQube, • SQL, Python, PowerBI, Tableau, Apache Spark, Hadoop, Web & Scripting, HTML, CSS, JavaScript, Django, O365 Administration, Google Suite, Google Workspace, Microsoft PowerPoint, Trello, Jira, Slack, Zoom, Linux, Windows.

PROJECTS

SupportPulse – IT Helpdesk Web App

- 🔗 GitHub: <https://github.com/imakena2/supportPulse>
 - Simulates a real-world IT service desk environment.
 - Built using Django, SQL, HTML, and CSS.
 - Features include ticket logging, categorization, SLA tracking, and resolution monitoring.

Mwethe Clinic Booking System

- 🔗 GitHub: <https://github.com/imakena2/Clinic-Booking-System.git>
 - Full-stack clinic booking system built using SQL and other web technologies.
Enables streamlined appointment management, patient records, and reporting.
Focused on delivering an efficient scheduling workflow and a user-friendly interface.

CleanCity – Software Testing Project

- 🔗 GitHub: <https://github.com/imakena2/Software-Testing.git>
 - Manual software testing project using JIRA and test case templates.
 - Practiced test planning, bug reporting, and regression testing.
 - Covered positive/negative test scenarios and real-world issue tracking simulations.

DevSecOps Final Project

- 🔗 GitHub: <https://github.com/imakena2/devsecops-final-project.git>
 - Implemented a CI/CD pipeline integrating security checks using SonarQube and Trivy.
 - Focused on securing code and infrastructure during the deployment process.
 - Demonstrated integration of DevSecOps principles in automated testing environments.
