WORK EXPERIENCE

Technology for Development Assistant

Save the Children Kenya & Madagascar

Jan 2025 – Aug 2025

(Role focused on data systems, automation, and AI-driven decision support)

- Revived and modernized an AI-powered child protection dashboard for anticipatory action, updating web scraping scripts and redesigning the UX using Framer to deliver clear wireframes for developers — improving usability and stakeholder adoption.
- Analyzed and visualized data for a carbon offset project using Excel (PivotTables, VLOOKUP) and Power BI, producing clean, accurate reports that supported environmental impact tracking and donor reporting.
- Partnered with technical and non-technical stakeholders to deliver data storytelling sessions, translating complex findings into compelling visual narratives presented to program teams and the Communications Department.
- Conducted technical research and partner mapping for ed-tech and climate-resilient AI initiatives, delivering high-quality datasets and system recommendations aligned with organizational innovation goals.
- Supported business development by engaging donors and partners across ed-tech, telecom, and climate resilience sectors, contributing to multi-stakeholder innovation pipelines.

Freshly Farms (Startup)

Backend Developer Intern

August 2024 – October 2024

- Designed and managed SQL and NoSQL databases (PostgreSQL, MongoDB) with optimized indexing and scalable schemas, supporting efficient querying for analytics and reporting. Applied ACID principles and database normalization to ensure data consistency and integrity across systems.
- Built RESTful APIs using Python, Django, and DRF to enable secure data flow between systems forming the foundation for data ingestion and transformation pipelines.
- Created the User profile management system, this included user authentication and authorization. I was also in charge of creating a market place in the platform that would allow the user (farmer) to upload their products and be to sell them and view the selling analytics
- Assisted in security management system integration for the application system backend. This included API protection by rate limiting using django-throttling, securing headers using Django-CORS-Headers, authorization and authentication

Wananchi Group -ZUKU KENYA

Accounts payable Intern

Feb 2022- May 2022

- Managed payments of supplies and beneficiaries, ensuring that there are no discrepancies between different accounts and timely payment
- Used excel to manage the reconciliation of accounts for Kenya, Tanzania, Uganda and Malawi. Allowing me to understand different finance properties at an African stage and gain financial exposure
- Conducted data analysis of financial records including data cleaning, indexing and grouping allowing effective report writing and data visualization of the information using Excel VLOOKUP and conditional formatting,
- Assisted in auditing of the organizations financial records by researching and uploading and preparing of the required documents and folders

SKILLS SET

- Advanced Python Development : including web development, file handling.OOP
- Database Management : Skilled in designing and managing relational and non-relational databases including PostgreSQL, MySQL, Mongo DB.
- Containerization & Orchestration : Experienced with Docker for application containerization and deployment.
- CI/CD Pipeline Development : knowledge of Continuous Integration and Continuous Deployment tools like GitLab
- Data analysis and visualization tools like Excel, Power BI, SQL
- Version Control : Proficient in Git for collaborative development and source code management using platforms like GitHub and GitLab.
- Project Management : Familiarity with Agile methodologies and experience in using tools such as Asana, Notion, Jira, and Trello to manage project timelines and deliverables.

EDUCATION

MORINGA SCHOOL

Software Development

Feb 2024 – Nov 2024

- Gained proficiency in full stack development with specialization in both frontend and backend development

Catholic University of Eastern Africa

Bachelor's degree in international relations

May 2019 – Oct 2023

- Relevant Coursework: Environmental Sustainability Governance (ESG), International development
