EDUCATION

Multimedia University of Kenya | Nairobi, Kenya

2021-2025

Bachelor of Science in Computer Science

Certifications:

Coursera: Neural Networks and Deep Learning by deeplearning.ai, Convolutional Neural Networks by deeplearning.ai, Sequence Models by deeplearning.ai, Improving Deep Neural Networks: Hyper-parameter Tuning Regularization, and Optimization by deeplearning.ai, Structuring Machine Learning projects by deeplearning.ai

Udacity: AI Programming with Python

PROJECTS

Real-Time Traffic Intelligence | *PyTorch, OpenCV, Python, Flask, Roboflow, REST API*

- Engineered a real-time computer vision system for urban road monitoring, featuring object detection, tracking, speed estimation, and distance covered. Deployed via Flask.

Landmark Recognition(Udacity) | *Pytorch, Python, Jupyter*

- Developed a deep learning pipeline to classify images of global landmarks using convolutional neural networks. Tuned for generalization across varied geographical conditions.

Explorations in Gaussian Splatting | *Python, OpenGL, NumPy, PyTorch*

- Investigated 3D scene reconstruction using Gaussian splatting techniques, focusing on rendering performance, surface detail preservation, and real-time potential in visualization pipelines.

AI-Powered Surveillance | *OpenCV, PyTorch, Fast API, python GUI*

- Built a multifunctional surveillance system with real-time object detection and behavioral analytics optimized for deployment on edge devices.

Satellite-Based Disaster Monitoring (NVIDIA) | *Remote Sensing*

- Built an AI-driven model that processes satellite imagery to detect natural disasters (e.g., floods, wildfires) in real time, enabling faster emergency response and risk mitigation.

Predictive Analytics for Bike-Sharing

- Implemented a machine learning solution for demand forecasting in bike-sharing systems using historical usage data and weather trends. Delivered insights to optimize fleet distribution.

EXPERIENCE

Software Engineering Intern | Tsavo Gate Africa

Nairobi, Kenya | August-Present, 2025

- Currently working on full stack development of web application; particularly backend

Software/Business Development Intern | Baobab Systems

Nairobi, Kenya | June– August, 2024

- Operated at the intersection of product engineering and business development in a cloud-native startup environment.
- Contributed to the development of responsive, web applications using modern frontend frameworks.
- Supported the implementation of containerized CI/CD workflows, improving software delivery speed and reliability.
- Supported business development by identifying potential leads and aligning solutions to client pain points.

Student Intern | National Registration Bureau

Nairobi, Kenya | May-June, 2023

- Provided technical support for national ID card systems, including live capture devices and automation services.
- Conducted installation, configuration, and updates of critical software applications across multiple workstations.
- Administered and maintained LAN infrastructure — troubleshooting routers, switches, and endpoint connectivity issues.

SKILLS & TECHNICAL TOOLS

Languages: Python, Java, JavaScript, Typescript

Frameworks/ Libraries: PyTorch, Tensorflow, OpenCV, Scikit-learn, Keras, Pandas, Numpy, Matplotlib, Flask, Spring

Platforms: Version Control, Jupyter, AWS Sagemaker, Docker

Soft Skills: Strong communication and teamwork, Problem-solving and adaptability, Critical thinking and analytical reasoning
