PROFILE

Dedicated Computer Science student with strong foundation in network administration, system support, and software development. Skilled in diagnosing ICT issues, setting up infrastructure, and providing user support. Passionate about using technology to improve efficiency and service delivery.

EDUCATION

BSc. Computer Science

Zetech University | 2022 - 2025
Networks, Database Systems, Security, Web Development, AI

KCSE

Kisumu Boys High School |
2018 - 2022

TECHNICAL SKILLS

Programming

Python

Java

JavaScript

Web Development

EXPERIENCE

ICT Attaché | Vihiga County Referral Hospital

May-Aug 2025

- Installed and configured networking equipment including routers and switches
- Registered 200+ staff on biometric system and managed Wi-Fi setup
- Maintained printers, scanners, and desktop systems across departments
- Assisted in software updates and antivirus deployment
- Documented maintenance activities for ICT supervisor

Freelance Web Developer | Remote

2023 - Present

- Developed responsive websites for small businesses and organizations
- Integrated frontend with backend APIs and managed hosting
- Optimized website performance and SEO for better visibility

FEATURED PROJECTS

Stock Price Analysis Dashboard

2026

Python • Flask • ML • Plotly

Comprehensive stock analysis platform with real-time monitoring, technical indicators (SMA, RSI, MACD), risk metrics (Sharpe, VaR), and ML predictions using XGBoost. Features portfolio optimization with efficient frontier visualization.

• 8 stocks analyzed • 5+ years data • Real-time WebSocket updates • 4 ML models

HTML/CSS

React

Django

Flask

Data Science

Pandas

NumPy

Scikit-learn

XGBoost

Databases

MySQL

PostgreSQL

MongoDB

Networking

Router Config

LAN/WAN

TCP/IP

CERTIFICATIONS

Cisco Networking Basics

Cisco Networking Academy

IoT and Digital Transformation

Cisco Networking Academy

Data Analysis with Python

freeCodeCamp

DIBU Auctions

2025

Django • WebSocket • MySQL

Secure online auction system with real-time bidding, user authentication, role-based dashboards, and automated notifications.

Medical Recommendation System

2024

Flask • Scikit-learn • Pandas

ML web app that recommends treatments based on symptom severity using classification models.

ACHIEVEMENTS

Presented "Secure Web Applications Using Django" at University ICT Symposium (2025)

Developed comprehensive stock analysis platform with 8+ machine learning models

Implemented biometric registration system for 200+ hospital staff
