EXPERIENCE

[Safaricom PLC](#) — Backend Developer

Oct 2024 - April 2025

-Improved fault visibility by 70% by designing and implementing a REST API that fetched and categorized error logs for failed customer and order creations.

-Reduced UAT feedback loops by 40% by actively participating in User Acceptance Testing (UAT) with the SDIT team, rapidly resolving backend bugs and aligning functionality with business goals.

-Strengthened system security posture by conducting a security audit of backend APIs alongside the Cybersecurity team, ensuring full compliance with OWASP guidelines and Safaricom's internal security protocols.

-Enhanced DevOps deployment efficiency by automating build processes via Jenkins and deploying Dockerized microservices into OpenShift, enabling faster iterations and rollbacks.

[Nyansapo AI](#) — Software Engineer

March 2021 - Feb 2024

-Reduced crash reports by 60% by refactoring a legacy Android app from Java to Kotlin, introducing Jetpack components, and applying Clean Architecture and MVVM, significantly improving code maintainability and UI responsiveness.

-Decreased database query latency by 45% by migrating from PostgreSQL to Firebase Cloud Firestore, introducing Firestore's offline support and live synchronization for better scalability in low-connectivity regions.

-Accelerated API performance by 35% by developing RESTful and GraphQL APIs using Kotlin Ktor and Apollo Server (TypeScript) to bridge the dashboard and mobile clients, improving dashboard responsiveness.

-Cut developer onboarding time by 50% through extensive documentation of the database schema, Firestore rules, and reusable query patterns.

EDUCATION

University Of Nairobi, Kenya — Bachelor of Science (Microprocessor Technology and Instrumentation)

SKILLS

Programming Languages: Kotlin, Java, C#, TypeScript, Rust, SQL, and JavaScript

Backend: Springboot using Java and Kotlin
.NET using C#
GraphQL using TypeScript
actix_web using Rust

Build Systems: Gradle, Maven

Android: Jetpack components, Material Design Components, Dagger-Hilt

Software Architecture: Clean Architecture, MVVM, MVC

Container Orchestration & DevOps: Azure, AWS, Google Cloud, OpenShift, Docker, Jenkins, FluxCD, Harbor, Git

Monitoring & Logging: ELK Stack (Elasticsearch, Logstash, Kibana)

Database Management: MySQL, Firebase, PostgreSQL

Agile Methodologies: Agile Project Management, Scrum ceremonies

LANGUAGES

English, Kiswahili
