SUMMARY

I am a highly resourceful data scientist with experience in data acquisition, data modeling, statistical analysis, machine learning, deep learning, and natural language processing among others. I bring strong skills in team building and project management that help data driven organizations improve decision making and drive measurable impact. I am passionate about solving complex problems and committed to continuous learning, I am currently open to full time or part-time opportunities, remote or on-site, where I can apply my analytical mindset to support smarter, evidence-based decisions.

TECHNICAL SKILLS

- Python, SQL, Tableau, Power BI, Excel
- ETL Processes & Data Warehousing
- Database Design & Optimization
- Machine Learning & Predictive Modeling
- AWS Cloud & Web Scraping
- Statistical Analysis & Data Visualization

TECHNICAL PROJECTS

1. Streamtime films recommendation system [github](#)

This project builds a hybrid movie recommendation system for Streamtime Films to serve both regular and new users using collaborative and content-based filtering. This project;

- **Developed** a hybrid recommendation system using collaborative and content-based filtering to improve user engagement.
- **Implemented** a cold-start solution that enabled relevant suggestions for users with little or no rating history.
- **Engineered** a filtering model combining user behavior and metadata to enhance recommendation diversity and accuracy

2. Health Insurance Cross-Sell Prediction [github](#)

This project builds a predictive model to determine whether existing health insurance clients are likely to purchase additional policies, such as vehicle insurance. This project:

- **Built** a predictive model to identify health insurance clients likely to purchase additional products, such as vehicle insurance.
- **Analyzed** client demographics and policy data to uncover patterns influencing cross-policy interest.
- **Improved** marketing targeting by segmenting clients based on predicted likelihood to buy additional insurance.

3. Microsoft Movie Studio Insight [github](#)

- **Analyzed** film genres and types using box office and ratings data to identify high-performing categories for strategic investment.
- **Provided** data-driven insights to guide Microsoft's content production decisions as it enters the movie industry.
- **Visualized** trends in film success to support executive decision-making in launching a new studio

EXPERIENCE

1. Data Analyst and Bi Developer

Daviski Solutions, Nakuru

02/2023 - 08/2025

- **Performed ETL** from multiple data sources into a warehouse, improving data accessibility and reporting efficiency.
- **Designed** and maintained databases to ensure data integrity and optimize performance for business insights.

2. Seers Team specialist

Seer's, South Florida St. Petersburg

08/ 2017 - 09/2018

- **Collected** and **analyzed** data on societal stigma to assess its prevalence and contributing factors.
- **Developed** evidence-based strategies to reduce stigma, improving community awareness and support initiatives.

EDUCATION

1. Moringa School, Nairobi

Data Science

02/ 2025 - 08/2025

Immersive Data Science Boot Camp Program

2. Egerton University, Nakuru, Njoro

Bachelor of Arts in Economics and Sociology

08 /2016-10/2023

3. Africa Institute of Management

Management

02/2025-12/2025
