

Brian Kipkirui Cheruiyot

Software Developer

+254 727279710 | briankipkiruimunyat@gmail.com | <https://github.com/Munyat>

SUMMARY

I am a software developer with a solid foundation in software engineering and hands-on experience in building scalable, high-performing applications. Proficient in developing full-stack solutions using JavaScript (Node.js, React) and Python (Flask). Proficient at analyzing complex data, designing efficient systems, and delivering robust, scalable solutions. Skilled in collaborating with cross-functional teams to produce high-quality software. A strong communicator, well-versed in Agile methodologies, and committed to continuous learning in the ever-evolving tech landscape. Eager to apply technical expertise and creative problem-solving to a challenging software development role

SKILLS

- **Frontend:** JavaScript, HTML5, CSS, React, Redux, Tailwind CSS, CSS Modules, Styled Components
- **Backend:** Python (Flask), Node.js, Express.js, RESTful API Design
- **Databases:** PostgreSQL, MongoDB, SQLite
- **DevOps & Tools:** Docker, Git, Linux, Swagger UI, JWT Authentication
- **Financial systems:** Financial Modeling, Excel, Data Analysis, CPA Principles

PROJECTS

Van Life: [Live Demo](#) | [Github link](#) Camper Rental Platform

- Developed a dynamic frontend using **React.js** and **Redux** for efficient state and data management.
- Styled with **CSS Modules**, ensuring a responsive and modern UI.
- Configured **Vite** for a fast and optimized development experience.
- Integrated a backend server with **Mirage.js**, handling API requests efficiently.
- Deployed the application on **Netlify** for high availability and performance.

Store Rest Api: [Live Demo](#) | [Github link](#) Scalable Inventory Management API

- Engineered a **Flask-based** API with JWT authentication, **token blacklisting**, and Swagger documentation.
- Optimized **PostgreSQL queries**, improving API response time by 30% for high-traffic endpoints.
- Deployed on Render with Docker, maintaining 100% uptime over 6 months.

ChatBot App: [Live Demo](#) | [Github link](#) Interactive Chatbot

- Developed an interactive AI-powered chatbot using **React**, and **Google Generative AI API**.
- Implemented real-time chat functionality with **local storage** for persistent chat history.
- Optimized chat rendering performance and improved **UI responsiveness** with **CSS** and event-driven updates.
- Integrated **Emoji Picker** for enhanced user experience and state management using React Hooks.

EXPERIENCE

Software Developer | Kemsoft Ltd

Feb 2025 - May 2025 | Kenya

- Designed and developed web applications using JavaScript (React, Node.js) and Python (Flask), delivering scalable solutions for client-facing platforms.
- Collaborated with a team of 4 developers to implement RESTful APIs, improving system interoperability and data access efficiency by 25%.
- Utilized Git for version control and Docker for containerized deployments, ensuring consistent development and production environments.

Key Accomplishments:

- Reduced application load times by 20% through frontend optimization techniques, including lazy loading and code splitting.

Data Entry| Civil Registration Office

June 2020 - Dec 2020 | Kenya

- Accurately entering data into databases, spreadsheets, or other computerized systems.
- Automated manual data workflows using Excel macros, boosting team productivity by 30%.
- Spearheaded a digitization initiative, migrating 10,000+ records to a SQL database.

Key Accomplishments:

- Increased data entry speed by 30% through improved accuracy and efficiency, reducing processing times.
- Implemented a streamlined filing system that improved record retrieval time by 40%.

EDUCATION

Moringa School | Software Engineering

Feb 2024 - Dec 2024

Relevant Coursework:

- **Full-Stack Web Development:** Built dynamic web applications using JavaScript, React and Flask.
- **Data Structures & Algorithms:** Gained a strong foundation in optimizing code efficiency and solving complex problems.
- **Database Management:** Designed and implemented databases using PostgreSQL, focusing on data integrity and relational data modeling.
- **API Development:** Developed RESTful APIs with secure JWT-based authentication and CRUD operations.
- **Version Control & Collaboration:** Collaborated on projects using Git and GitHub, following best practices in version control.
- **Deployment & DevOps:** Deployed applications using Docker and Linux, with a focus on maintaining scalability and stability.

Egerton University | Bachelor of Commerce (Finance option)

Sep 2019 - Nov 2023

- Second Class Honors

Relevant Coursework:

- **Financial Management:** Analyzed financial statements and developed strategies for financial planning and risk management.
- **Corporate Finance:** Studied capital structure, investment analysis, and valuation techniques.
- **Investment Analysis & Portfolio Management:** Gained knowledge of asset allocation, portfolio theory, and risk assessment.
- **Accounting Principles:** Developed skills in financial reporting, cost accounting, and auditing.
- **Economics:** Applied economic principles in decision-making and market analysis.
- **Quantitative Methods:** Used statistical tools and quantitative techniques for financial modeling and data analysis.

Kasneb | CPA

Dec 2021

- Foundational level

Relevant Coursework: Financial Accounting, Business Law, Management Accounting, Taxation, Auditing, Information Systems in Accounting
