SUMMARY

A highly motivated Information Technology professional with a Bachelor of Science in Information Technology from Mount Kenya University. I bring strong expertise in ICT support, networking, software development, and technical troubleshooting. I am committed to delivering efficient ICT solutions through innovation, analytical thinking, and continuous improvement. My goal is to contribute to organizational excellence by leveraging technology to solve real-world problems and enhance operational performance.

CAREER OBJECTIVE

To secure a challenging ICT, technical support, or software development role where I can apply my academic knowledge and technical skills to support system efficiency, enhance user productivity, and contribute to organisational success while continuously advancing my expertise.

WORK EXPERIENCE

ICT Support Attachée – Kenya Forest Service, Karura, Nairobi January – May 2024

Key Responsibilities:

- Provided timely user support by diagnosing, troubleshooting, and resolving hardware and software issues.
- Installed, configured, and updated software applications to ensure systems remained secure and efficient.
- Conducted hardware repair and maintenance for computers, printers, and networking equipment.
- Supported network configuration, including cabling, router setup, and connection testing.
- Assisted with system testing, software development activities, and debugging processes.
- Managed ICT inventory, tracked equipment movement, and maintained accurate documentation.
- Assisted in preparing technical reports, formatting documents, and handling departmental digital correspondence.

EDUCATION

Bachelor of Science in Information Technology 2018 - 2025

Mount Kenya University – Nairobi Campus

Kenya Certificate of Secondary Education 2014 - 2017

Machakos Girls High School

PROJECTS

Online Shop Booking System

Developed a PHP/MySQL-based system for managing product bookings and payments. Included an admin dashboard, customer authentication, and contact modules using HTML, CSS, and Bootstrap.

Student Management System

Designed and implemented a secure student records management system with login authentication and CRUD functionalities.

KEY SKILLS

- **Programming Languages (C, C++, PHP):** Ability to develop applications, automate processes, and build efficient solutions.
- **Web Technologies (HTML, CSS, Bootstrap):** Skilled in developing responsive and user-friendly web interfaces.
- **Database Management (MySQL):** Competent in designing databases, performing CRUD operations, and generating analytical reports.
- **Networking (Configuration & Troubleshooting):** Experienced in setting up networks, diagnosing connectivity issues, and performing Ethernet cabling.
- **Office Applications (Word, Excel, PowerPoint):** Proficient in preparing reports, analysing data, and delivering structured presentations.
- **Hardware & Software Support:** Skilled in device setup, system installation, and routine maintenance to ensure smooth ICT operations.
- **Teamwork & Collaboration:** Strong communicator capable of working effectively within technical and cross-functional teams.
