PERSONAL PROFILE

A Motivated and detail-oriented IT professional with a Bachelor's Degree in Business and Information Technology and a Diploma in Information and Communication Technology. I bring a solid foundation in technical support, customer service, and software applications, combined with a growing interest in software configuration, data management, and report development. Skilled in troubleshooting, coding, with hands-on experience in system configuration, data migration, and user support. I am passionate about delivering innovative technology solutions that enhance customer satisfaction and efficiency, and I thrive in collaborative environments where problem-solving and adaptability are essential.

KEY COMPETENCES

- Strong ability in writing and to apply general rules to specific problems to produce answers that make sense.
- Networking
- Soft skills -good communication skills (verbal form, written form and also active listening).
- Problem solving.
