

BRYAN NKANDI FEDDIE

ICT & Cybersecurity Specialist | Systems Support | Data Management & Analytics

bryanfeddie@gmail.com | +254 797 536 313 | Nairobi, Kenya

[LinkedIn: bryan-feddie](#)

PROFESSIONAL SUMMARY

A results-oriented ICT and Cybersecurity Specialist with over 2 years of hands-on experience in systems support, network management, data protection, and cybersecurity operations. Skilled in identifying vulnerabilities, optimizing system performance, and implementing secure data management solutions.

Certified in Cybersecurity (2024), Data Science (2025), and Python Programming (2025), Bryan brings a multidisciplinary edge to ICT operations — combining analytical rigor, technical agility, and a proactive approach to risk mitigation. Passionate about leveraging technology to secure digital infrastructure and drive innovation within public institutions.

EDUCATION

- **Jomo Kenyatta University of Agriculture and Technology (JKUAT)**
Bachelor of Business Information Technology – 2024
 - **Data Science Bootcamp** – 2025
 - **Python Programming Certification** – 2025
 - **Cybersecurity Certification** – 2024
 - **Kabarak High School** – KCSE, *Grade B+ (2020)*
 - **Ngong Hills Primary School** – KCPE, *410 Marks (2016)*
-

PROFESSIONAL EXPERIENCE

Freelance ICT, data analysis & Cybersecurity Projects

December 2023 – Present | Remote

- Provided **network and system security support** for SMEs, including setup of secure file-sharing and access controls.
- Implemented **data protection protocols** to minimize risks of data breaches and unauthorized access.
- Conducted **vulnerability assessments** on small-scale networks, identifying and remediating potential threats.
- Configured **basic firewalls and endpoint protection tools** to improve client security posture.

- Led **data visualization and reporting** initiatives using Python, Power BI, and Excel for cybersecurity insights.

The National Treasury, Kenya – Systems Support (E-Citizen Platform)

September 2023 – December 2023 | Nairobi

- Supported the **E-Citizen platform**, ensuring optimal system uptime, user access control, and data integrity.
 - Assisted in **incident response** and troubleshooting, maintaining compliance with ICT security standards.
 - Partnered with ICT and cybersecurity teams to enhance **system resilience** and ensure secure data management.
 - Documented performance issues, monitored system health, and contributed to ICT risk assessments.
-

SELECTED PROJECTS

Murang'a Hospital – TPT Drug Intake Analysis (2025)

- Analyzed healthcare data to identify compliance gaps and risks related to treatment adherence.
- Delivered data-driven recommendations that improved reporting accuracy and security of medical records.

Cyber Threat Awareness Dashboard (2025)

- Designed a simple dashboard tracking phishing attempts and malware trends using **Python and Power BI**.
- Presented actionable insights to guide user awareness campaigns and data protection measures.

Exploratory Data Analysis Project (2025)

- Applied **Python (Pandas, NumPy)** for dataset cleaning and anomaly detection.
 - Visualized findings using **Matplotlib** and **Seaborn** to support decision-making and cyber risk profiling.
-

TECHNICAL SKILLS

Core Competencies:

Cybersecurity | Systems Support | Network Monitoring | Data Protection | ICT Risk Management

Networking & Tools:

TCP/IP | DNS | DHCP | VLANs | Cisco Configuration (Basic) | Firewall Setup | Endpoint Security

Programming & Analytics:

Python | SQL | R (Basic) | Excel (Advanced) | Tableau | Power BI

Cybersecurity Skills:

Vulnerability Assessment | Threat Detection | Incident Response | Secure Data Handling | Risk Analysis

Soft Skills:

Analytical Thinking | Communication | Collaboration | Problem Solving | Continuous Learning

CERTIFICATIONS

- **Cybersecurity Certification** – 2024
 - **Data Science Bootcamp** – 2025
 - **Python Programming Certification** – 2025
-

LEADERSHIP & COMMUNITY ENGAGEMENT

- Participated in **university hackathons**, focusing on data integrity and threat simulation.
 - Volunteered in **community ICT literacy programs**, promoting secure technology usage and digital awareness.
 - Actively researching on **emerging cybersecurity technologies** such as AI in threat detection and blockchain resilience.
