PROFESSIONAL SUMMARY

Security Analyst and Web Developer with 2+ years' experience building and maintaining high-fidelity, responsive web applications using HTML5, SCSS, JavaScript and TypeScript. Experienced in threat modeling, secure coding practices, and vulnerability assessment. Deeply familiar with performance optimization, SEO best practices, and accessibility (WCAG). Comfortable collaborating with UX and visual designers to translate wireframes into pixel-perfect interfaces. Skilled in Git workflows, bash scripting on Ubuntu, and contributing to open source projects.

SKILLS

Frontend: HTML5, CSS3/SCSS, JavaScript (ES6+), TypeScript, React, Next.js, Angular
Backend: Node.js/Express, Python/FastAPI, Java, Spring Boot, MongoDB, PostgreSQL, Prisma ORM
Tooling & Version Control: Git/GitHub, Webpack, Babel, ESLint, Prettier
Performance & SEO: Code splitting, lazy loading, semantic markup, meta tags
Security Tools & Analysis: Wireshark, Burp Suite, Nmap, Nessus, Metasploit, OSINT tools, Splunk
Soft Skills: Problem solving, critical thinking, attention to detail, communication, teamwork, adaptability, continuous learning, ethical judgment

PROFESSIONAL EXPERIENCE

E&M Technology House — *Full Stack Developer & Security Analyst*
Jan 2024 – Mar 2025

- Developed responsive React interfaces with reusable components and SCSS modules.
- Implemented state management using hooks and context API.
- Automated deployments using GitHub Actions, Docker, and Bash on Ubuntu servers.
- Optimized performance via code splitting, caching, and semantic structure.
- Improved SEO and mobile responsiveness across project pages.
- Conducted basic vulnerability assessments using Nmap and Nessus; documented and flagged risks.

SELECTED PROJECTS

NovaHealth – *Healthcare Information Platform*

🌐 <https://novahealth.onrender.com>

Tech: React + Vite + TypeScript, Node.js, Express, MongoDB (MERN Stack)

- Designed and built a responsive, modern health portal with patient-focused features.
- Integrated secure backend API with JWT authentication and dynamic health dashboards.
- Delivered production-grade UI with form validation, protected routes, and accessibility.

WeatherWhiz – *Real-time Weather App*

🌐 <https://weather-whiz-mu.vercel.app/>

Tech: React, OpenWeather API

- Created a minimalist frontend-only application that fetches and displays live weather data.
- Implemented location-based querying and temperature unit toggling.
- Deployed using Vercel with modern design and loading skeletons.

EDUCATION

BSc in Mathematics

Jomo Kenyatta University of Agriculture and Technology

ICDL Certificate

Coast Institute of Technology

CERTIFICATIONS

- Cybersecurity (IBM SkillsBuild)
- Data Science and Analytics (HP Life Foundation)
- Artificial Intelligence (ALX Africa)
- Programming in Python (LinkedIn Learning)
- Software Engineering (Power Learn Project Academy)
- Security Analyst Certification – Cybershujaa
- Google Cybersecurity Professional Certificate – Coursera (*ongoing*)
