PROFESSIONAL SUMMARY

- I'm a software engineer with over 2 years of experience building secure, reliable, and scalable systems — mostly in the financial services and smart energy space. I work mainly with Java and Spring Boot, and I've built microservice-based applications that integrate with platforms like core banking systems and mobile money (M-PESA). I'm comfortable working in Agile teams and using DevOps tools like Docker, Jenkins, and GitHub to streamline development and deployment. I enjoy solving real-world problems through clean code, automation, and collaboration — especially when system uptime and user trust really matter.

PROFESSIONAL EXPERIENCE

• E&M TECHNOLOGY HOUSE LTD

Software Engineer - Financial Systems Integration

Nairobi, Kenya

Jan 2024 – Present

- Worked on multiple mission-critical software projects for clients in the energy and banking sectors, delivering robust backend systems, full-stack web and mobile applications, and enterprise-grade integrations.

Project: ERP & Core Banking System Integrations

- Contributed to the development of a full-featured ERP system designed for banks, covering modules like HR, Finance, Procurement, Inventory, Fixed Assets, Employee Self-Service, and Supplier Portal.
- Designed the platform using a microservices architecture, making it flexible, scalable, and easier to maintain.
- Built backend services in Spring Boot and worked on secure API integrations with core banking systems to support real-time financial operations.
- Gained hands-on exposure to containerization with Docker during deployment of microservices, with a focus on scalability and fault tolerance.
- Helped implement role-based access control, multi-tenant setup, and reporting tools tailored to the needs of banking clients.
- Focused on system stability, uptime, and security to meet strict performance expectations in the financial services industry.

Project: Smart Energy Metering System (Net Metering)

(Team Lead)

- Led the development of an Automatic Meter Reading (AMR) infrastructure to enable real-time smart energy monitoring and remote token loading.
- Integrated a DLMS vending system using Spring Boot, ensuring compliance with STSA metering standards.
- Designed and secured RESTful APIs using Spring Boot and Spring Security, enabling reliable communication between the backend, mobile app, and metering devices.
- Deployed a full-stack platform (Spring Boot backend, AngularJS frontend, Flutter mobile app) with near-instantaneous token updates to meters.
- Provided customer support and remote meter management, ensuring reliability and system uptime.

EDUCATION

• JOMO KENYATTA UNIVERSITY OF AGRICULTURE AND TECHNOLOGY

BSc in Mechatronic Engineering

Sept 2018 - Dec 2023

TECHNICAL SKILLS

- Languages:** Java, Python, Bash
- Frameworks:** Spring Boot, AngularJS
- Databases:** MySQL, PostgreSQL, MongoDB
- DevOps Tools:** Docker, GitHub, Jenkins,
- APIs:** RESTful APIs (JSON), SOAP, OAuth2, JWT, API Security (Spring Security)

CERTIFICATIONS

- Introduction to CyberSecurity Bootcamp - CyberTalents

CORE STRENGTHS

- Clear communicator with strong presentation skills and ability to explain complex technical ideas to non-technical stakeholders.
- Collaborative mindset with a proven track record of contributing in agile, cross-functional teams.
- Quick to learn and adapt; comfortable navigating ambiguity and solving real-world problems under tight deadlines.
- Customer- and outcome-focused; committed to building systems that solve real business needs and deliver user value.
