## SUMMARY

---

Financial systems engineer who implements, customizes, and supports ERP solutions and multi-channel banking platforms for financial institutions. I specialize in troubleshooting complex technical issues and turning business requirements into reliable software solutions that keep critical financial operations running smoothly

## SKILLS

---

- Technical Skills: Unit4ERP, Microsoft Dynamics 365, PrismHr, SQL, T-SQL, Excel Macros, RERX and Excel Report writing, AG16
- Tools: Git, SQL Server, Jira, bitbucket, Citrix, Salesforce

## EXPERIENCE

---

### **Channels Support and Implementation Engineer** | **CraftSilicon**

June 2025- Present | Nairobi

- Integrate mobile, internet, and agency banking channels for banks, SACCOs, and microfinance institutions.
- Design and deploy secure APIs to improve system communication and transaction reliability.
- Provide L1 and L2 support, troubleshoot system issues, and minimize downtime.
- Use SQL to manage and reconcile transactional data, ensuring accurate reporting.
- Monitor transactions, resolve discrepancies, and ensure regulatory compliance.
- Configure middleware to streamline communication with core banking systems
- Collaborate with clients to gather requirements, deliver solutions, and train users
- Offer alternative solutions where appropriate to prevent disruption in client activities
- Document system setups, implementations, and resolutions for audits and knowledge sharing
- Perform UAT and regression testing to validate features and reduce deployment risks.

### **Software Developer** | **eBiashara Africa LTD**

June 2023- May 2025 | Nairobi

- Design and develop custom Odoo modules to meet specific business requirements
- Integrate Odoo with third-party systems such as e-commerce platforms and payment gateways via REST APIs
- Manage PostgreSQL databases by optimizing queries and implementing efficient data models
- Conduct unit and integration testing, resolve performance bottlenecks, and maintain system stability
- Collaborate with cross-functional teams to translate business requirements into technical solutions
- Provide L1–L3 support, troubleshooting functional and technical issues in Odoo modules
- Monitor system logs, investigate recurring issues, and implement preventive measures to reduce downtime
- Deliver end-user training and prepare user manuals to support system adoption
- Assist with system upgrades, patches, and version migrations to ensure smooth transitions

### **Financial Management System Administrator** | **Save The Children International**

July 2023- December 2024 | Nairobi

- Provide customer support for functional, operational, and technical issues on Unit4 ERP
- Develop T-SQL and A-SQL interfaces between Unit4 ERP and other enterprise systems
- Develop and enhance Finance Management System (FMS) modules on Agresso ERP
- Perform database analysis and troubleshooting using T-SQL queries in SQL Server
- Conduct unit testing of ERP modules and reports to ensure compliance with requirements.

- Engage with stakeholders to gather technical requirements, define priorities, and review project progress
- Build and maintain accelerator reports for global finance teams using Agresso browser enquiries, SQL, and macros

#### **Systems Developer Internship | Surestep Innovation Centre**

April 2023- June 2023 |Nairobi

- Development and customization of Kenyatta University's human resource management system using Microsoft Dynamics 365 Business Central as per clients' requirements.
- Provide support for integration with third-party software.
- Provide go-live and post-implementation support for KENCREAM and SHIRIKA SACCOs.
- Test code for the validity of results, accuracy, and conformance to specified development specifications.

#### **Trainee Developer | Attain Enterprise Solutions**

January 2023- March 2023 |Nairobi

- Provided support to clients' issues using C# and . NET for the KUCCPS human resource management system
- Participate in team code reviews, documentation, and quality assurance meetings.
- Conduct system testing for clients to ensure the system is working as expected

## **EDUCATION**

---

**South Eastern Kenya University** | Bachelor of Science in Computer Science

**Moringa School** | Software Engineering
