PROFESSIONAL SUMMARY

Technical Support Engineer with 5+ years of experience owning, supporting, and improving production systems in fintech and regulated environments. Strong operations mindset with hands-on engineering experience in incident response, root-cause analysis, APIs, and system integrations. Proven ability to design support processes, collaborate cross-functionally, and drive long-term platform stability.

CORE TECHNICAL EXPERTISE

Platforms & Systems: Salesforce (CPQ, Service Cloud, Revenue Cloud), Web Platforms

Programming & Frameworks: Apex, Lightning Web Components (LWC), JavaScript, TypeScript, Python, PHP, Node.js, React

APIs & Integrations: REST APIs, OAuth2, third-party integrations (Stripe, Google APIs)

Operations & Support: Incident management, root-cause analysis, production support, release support, system monitoring, SLA-driven delivery

Security: Role-based access control, authentication flows, data integrity, environment governance

Delivery & Collaboration: Technical workshops, proofs of concept (PoCs), stakeholder presentations, Agile delivery

Tools: Git, CI/CD, Jira, MySQL

PROFESSIONAL EXPERIENCE

Blue Consulting

Product & Support Lead | Aug 2024–Present

- Act as the primary technical escalation point for internal platforms, partnering with business and executive stakeholders to resolve high-impact issues.
- Led the architecture revamp of internal support and CRM platforms, improving usability, performance, and operational efficiency.
- Owned production support across releases, coordinating incident response, fixes, and post-incident reviews to ensure system reliability.
- Designed and delivered technical solution proposals, workflows, and integration strategies aligned with business needs.
- Managed technical discovery, backlog prioritization, and delivery for service and CRM modules.
- Delivered quoting workflow improvements that reduced processing time by 30%, improving sales velocity and SLA adherence.
- Drove continuous improvement by identifying recurring issues and implementing root-cause fixes.
- Mentored developers through code reviews and hands-on technical guidance.

Salesforce Developer & Support Engineer | Feb 2023–Present

- Designed and supported enterprise CRM solutions using Salesforce CPQ and Service Cloud for complex quoting and revenue workflows.
- Built and maintained Lightning Web Components (LWC) to improve performance, modularity, and supportability.
- Developed and supported Apex automation, enforcing pricing rules, approvals, and data integrity.
- Owned the full lifecycle of features, from requirements and deployment to post-release support.
- Worked directly with customers to troubleshoot issues, explain system behavior, and deliver long-term fixes.
- Led enablement sessions that improved adoption and reduced support requests by 30%.

Inuka Africa Microfinance**Software Engineer | Oct 2021 – Feb 2023**

- Designed and launched web applications supporting financial operations.
- Designed, developed, and deployed features using Laravel and React for production systems used by internal and external users.
- Integrated third-party services (Stripe, Google APIs) to improve transaction success rates and platform reliability.
- Built secure, scalable APIs and services to support payment and data workflows.
- Achieved 80%+ automated test coverage, improving system reliability and deployment confidence.
- Collaborated with product and operations teams to modernize legacy workflows.

Andela Kenya (Eldo Hub)**Junior Software Developer | Oct 2021 – Jan 2022**

- Built and tested secure RESTful APIs for a recruitment platform, increasing platform usage by 30%.
- Implemented SSO and custom encryption mechanisms to enhance authentication and data security.
- Achieved 100% unit and integration test coverage for critical features.
- Participated in technical design reviews and collaborative problem-solving sessions.

Kenya Red Cross (Switch TV)**Graphics and Marketing Designer | June 2020–Jan 2021**

- Redesigned platform graphics and UX flow, resulting in a 40% increase in engagement.
- Delivered user-first design concepts for digital campaigns and live programs.

Kiambu County Government**ICT Intern | Jan 2018–April 2018**

- Supported configuration, administration, and troubleshooting of networking devices and IT infrastructure.
- Assisted in setting up and supporting technical infrastructure for county events and meetings.
- Gained foundational exposure to networking concepts, system support, and enterprise IT environments.

EDUCATION AND CERTIFICATION

KCA University,
B.Sc. in Business Information Technology

Feb 2016–Nov 2020

Moringa School,
Software Engineering (Full Stack)

Feb 2021–July 2021

Arizona State University,
Global Entrepreneurship and Innovation

Jan 2022–July 2022

CERTIFICATIONS

Salesforce Associate - Issued May 2023
Salesforce CPQ Specialist - In Progress
Salesforce Platform Developer - In Progress

COMMUNITY INVOLVEMENT

Tech Mentor (2022 - Present)

- Mentored 15+ bootcamp graduates on transitioning into tech roles.
- Delivered user-focused design and technical guidance in workshops and 1:1 sessions.
