EMPLOYMENT

Software Development Engineer **BQI Technologies** **Nov 2024 - Present**

- Working as a part of the Credit Tracker Team, design and build service APIs that let the user view and keep a track of his credit score, which is a key factor in deciding the creditworthiness of an individual.
- Introduced mechanism to send SMS and email notifications to the existing customer base, resulting in almost 15% increase in the returning customer base. This trustable base is used for cross selling other products.

Software Development Engineer **E&M Technology House Ltd** **Oct 2022 - Oct 2024**

- Randomized ads shown to the user such more exposure is given to the new advertisers resulting in the increase in conversion ratio by 15%.
- Built a payment gateway for core sacco banking services, decreasing the customer drop-offs for these services.
- Built a middleware microservice to integrate sacco and Bank systems. This increased efficiency in withdrawal, deposits and mini statement services.
- Collaborated closely with cross-functional teams to understand project requirements and deliver high-quality and customer-tailored software solutions.

Software Engineer **HI-NEX IT Solutions Company** **August 2021 - Sept 2022**

- Created consistent structural input format to maintain site continuity by authoring and implementing best-practices for designers and content providers.
- Tested and debugged site updates and prevented functional flaws from impacting public visitors.
- Monitored compliance with regulated accessibility standards.
- Troubleshoot issues with websites and fixed scripting and use issues.
- Configured and purchased domains for websites.
- Backed up or modified applications and related data to provide for disaster recovery.
- Worked with art directors to create dynamic websites.
