

MOHAMED BASHIR

SOFTWARE DEVELOPER

P.O. Box 70307-00400, Nairobi | +254 727 874 978 | mohaedbashir45@gmail.com | [Linkedin](#) | [Github](#)

Personal Profile

- An ambitious, self-driven, and energetic software developer passionate about developing innovative solutions that expedite efficiency and effective organizational access.
- I am a strong believer in being a master of my own craft and will take whatever measures necessary to achieve the goals set.

Key Skills

- Python, Django, Flask
- Linux,
- Spring Boot, React, JavaScript
- Version control, git
- GitOps, FluxCD.
- Database, SQL, Postgres, MySQL, MSSQL
- Docker
- Kubernetes
- CI/CD, Jenkins, github actions, gitlab ci.
- Monitoring, Dynatrace, ELK

Educational Background

Diploma of Science (Information Technology), Jomo Kenyatta University of Agriculture and Technology,
April 2023 – December 2024.

Software Development, Moringa School, November 2023 – May 2024.

Professional Experience

Technical Mentor – Harmony College

June 2024 – Present,

- **Mentored Junior Developers in Full-Stack:** Guided junior devs in building web apps using Python, Django, Flask, Java Spring Boot, and PostgreSQL.
- **Implemented DevOps Practices:** Introduced Docker, Kubernetes, and CI/CD with Jenkins, GitHub Actions, GitLab CI to streamline delivery.
- **Provided Expertise in Cloud Computing:** Shared knowledge on leveraging cloud platforms like AWS/GCP, and implementing IaC with Terraform/CloudFormation.
- **Promoted Version Control and Collaboration:** Mentored team on Git, GitOps, and tools like FluxCD for Kubernetes infrastructure.
- **Upskilled Team in Front-end Development:** Trained developers in JavaScript, React, and creating responsive, integrated web interfaces.
- **Fostered Database and SQL Proficiency:** Educated team on PostgreSQL design, maintenance, and efficient querying.
- **Shared Linux Administration Knowledge:** Trained team in Linux, shell scripting, and command-line tool skills for system tasks.
- **Established Monitoring and Observability:** Introduced Dynatrace, ELK stack to track performance, identify issues, and ensure availability.
- **Championed CI/CD Practices:** Guided team in implementing and maintaining CI/CD pipelines, automating

build, test, and deployment.

Web Developer, September 2023 – Present.

Personal Projects, Nairobi.

- Creating front-end designs that are visually appealing to the user.
- Developing client-side and server-side architecture.
- Developing and managing well-functioning databases.
- Ensuring applications and databases are secure.

Achievements

- Created a blog website that enables users to post, edit, and delete their blogs. It also enables other users to comment and the blog writer can delete comments they don't like.
- Worked with a team and created a poverty awareness app. I implemented a feature that enables users to make donations using Daraja API.
- Created a new app where a user was able to see different sources of news and see articles from the source they chose.
