

ISAACK KARANJA GITUNDU

IT Support Consultant | Junior Full Stack Developer

Nairobi, Kenya | +254 708 698 330 | isgitundu@gmail.com | linkedin.com/in/isaack-gitundu | github.com/aizooh

PROFESSIONAL SUMMARY

Detail-oriented IT Support Consultant and Junior Full Stack Developer with hands-on experience supporting enterprise users, managing networks, and building web-based applications. Proven track record in first and second-line IT support at Kenya Revenue Authority and Wananchi DT Sacco, alongside founding Sonitech Data Connections — a networking services business delivering LAN, Wi-Fi, and connectivity solutions to residential and business clients. Adept at troubleshooting hardware, software, and network issues across Windows environments, documenting IT procedures, and training users on technology tools. Brings a customer-first mindset, strong problem-solving ability, and a practical, solution-oriented approach to every engagement.

PROFESSIONAL EXPERIENCE

ICT Support Technician

October 2025 – December 2025

Kenya Revenue Authority (KRA) | Nyeri Office

- Provided day-to-day ICT support to staff, resolving login issues, application errors, and access challenges promptly
- Assisted users with system navigation and ensured smooth use of enterprise tools across the office
- Documented incidents, resolutions, and recurring issues to improve future troubleshooting efficiency
- Escalated complex technical issues to senior ICT staff following established procedures
- Supported routine system maintenance and reinforced proper ICT usage practices across departments
- Maintained professionalism and calm communication when assisting users under pressure

Technical Support Assistant

July 2025 – October 2025

Wananchi DT Sacco | Nairobi, Kenya

- Diagnosed and resolved hardware and software issues for end-users, minimising downtime and disruption
- Implemented system updates and security patches across networked devices
- Improved system reliability and supported basic cybersecurity practices including antivirus and device hygiene
- Documented recurring technical incidents to support long-term system improvements and IT knowledge base

Founder & Network Technician

January 2024 – Present

Sonitech Data Connections | Nairobi, Kenya

- Founded and independently manage a technical services business providing internet installation, diagnostics, and troubleshooting
- Designed and implemented LAN and Wi-Fi networks for residential and small business clients
- Configured routers, access points, and network security settings to client specifications
- Delivered professional customer-facing technical support, improving client satisfaction and service reliability
- Strengthened hands-on expertise in IT infrastructure, networking, and field troubleshooting

KEY PROJECTS

Expense Management System — MERN Stack | github.com/aizooh

- Designed and developed a full-stack expense tracking application with RESTful APIs for creation, categorisation, and reporting
- Built secure user authentication and management functionality with a responsive financial dashboard
- Focused on performance optimisation and clean, scalable architecture

Real-Time Weather Information System — REST API Integration

- Developed a web-based system displaying real-time weather data using third-party APIs
- Integrated REST APIs, handled JSON responses efficiently, and designed mobile-friendly user interfaces

KUCCPS Course Recommendation System — Machine Learning | Final Year Project

- Built an ML-powered course recommendation engine for Kenyan university applicants based on grades and preferences

HRM System — MERN Stack

- Developed a Human Resource Management system covering employee records, leave management, and departmental reporting
