

VICTOR ONDUSO ONGERE

2201, Nairobi,00100 | Telephone:0700272592 | Email:ongereonduso@gmail.com| [LinkedIn](#)

Dedicated IT professional with experience in technical support, cybersecurity, and ICT solutions delivery. Skilled in SQL and Oracle database administration to support business intelligence through effective data management and reporting. A collaborative problem solver with strong communication and technical skills, seeking consulting opportunities as a Business Intelligence Developer or Software Engineer.

TOP SKILLS & EXPERTISE

- **ERP (Enterprise Resource Planning) Account Management and Customer Support:** Proficient in ERP account management, demonstrating adeptness in resolving customer inquiries and ensuring seamless functionality to meet diverse business needs.
- **WordPress Maintenance:** Proficient in various aspects of WordPress development which include theme customization, security, and optimization for performance.
- **Server Administration and Monitoring:** Proficient in conducting routine system checks, implementing security protocols, and swiftly resolving any emerging server-related challenges.
- **Software Development:** I am proficient in software development encompassing mobile computing with Flutter, as well as web development using the MERN stack, Django and the .NET platform.
- **Cybersecurity:** Proficient in cloud computing and network security analysis, adept at designing and implementing secure networks. Additionally, skilled in conducting comprehensive vulnerability assessments and penetration testing using tools like the Burp Suite.
- **Application Support:** I have supported clients on various platforms including Palladium and Sage accounting software as well as Acumatica ERP.
- **Technical Issues Analysis:** I have previously engaged corporate clients and participated in the establishment of needs, goals, and objectives in the delivery of IT services.
- **Database Administration:** Skilled in database administration with proficiency in SQL for managing, optimizing, and securing relational databases.
- **Business Intelligence:** Skilled in integrating various platforms with tools such as Informatica and Snowflake to develop efficient data pipelines and support seamless, data-driven operations.

EDUCATION

2018-2022 **BSc. Information Technology,** Jomo Kenyatta University Of Agriculture and Technology
