Nairobi, Kenya | abongomark04@gmail.com | +254726208735 | [LinkedIn](#) | [GitHub](#)

SUMMARY

Results-driven Developer with experience in full-stack development, cloud services, and business intelligence. Proven expertise in JavaScript (React, Node.js), R Programming, and cloud platforms like AWS. Passionate about building high-performance applications and solving complex problems.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frameworks: React, Node.js, Express, Next.js

Cloud Computing: AWS

Databases: MongoDB, PostgreSQL, MySQL, Firebase

DevOps: Docker, GitHub Actions

Tools: Git, VS Code, Postman, Excel, Jupyter Notebooks, R Studio

EXPERIENCE

IT Intern

SANI – Kisumu, Kenya | Jan 2023 – Apr 2023

- Streamlined Microsoft Office application use and optimized data handling workflows, improving departmental efficiency by 20%.
- Maintained and audited ICT inventory, ensuring 100% compliance and reducing equipment downtime by 35%.
- Delivered technical support to 50+ end-users, resolving 90% of issues on first contact, significantly minimizing disruption to daily operations.
- Spearheaded data backups and system updates, enhancing data reliability and preparedness for audits

Junior Developer Intern

Kenya Nutritionists and Dieticians Institute (KNDI) – Nairobi, Kenya | Jan 2022 – Apr 2022

- Built and deployed internal utilities and dashboards, reducing manual data processing time by 40%.
- Collaborated with the ICT Manager to enhance database reliability, resulting in 25% faster query performance.
- Integrated the M-Pesa Daraja API into client systems, improving digital payment efficiency and user experience for 300+ users.
- Provided support to technical teams by resolving bugs and deploying patches, contributing to a 15% improvement in system uptime

PROJECTS

Car Yard Web App | [GitHub](#)

Tech Stack: React, Redux, Stripe, REST API

- Designed and deployed a responsive car dealership platform supporting up to 1,000 concurrent users.
- Integrated real-time car listings with advanced filtering and debounced search, enhancing UX and reducing server load.
- Connected to a public API and implemented Stripe payments, completing secure transactions under 5 seconds per flow.
- Implemented full routing, shopping cart logic, and state management via Redux.

Donation Tracking System | [GitHub](#)

Tech Stack: Node.js, Express, React, MongoDB, Firebase

- Engineered a full-stack donation logistics system used to track food supplies, reducing misallocations by 60%.
- Integrated real-time Maps and QR code scanning to verify dispatches and automate logs.
- Features include CRUD operations, report exports, logs audit trail, and admin dashboards.
- Designed for scalability tested to support 100+ concurrent transactions with efficient caching.

EDUCATION

Bachelor of Business Information Technology

Strathmore University, Nairobi — 2019 to 2024

- Major: Business Intelligence | Honors: Second Class Upper Division

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services
