
CURRICULUM VITAE

Full Name: Maina Franklin Nderitu

Phone: +254 741 448 731

Email: nderitumaina254@gmail.com

Location: Nairobi, Kenya

SUMMARY

Junior Software Engineer with full-stack experience and strong exposure to IT support and systems administration. Skilled in React for modern user interfaces and backend development using Python (Flask, Fast API) and C# (.NET). Experienced in managing user accounts, troubleshooting systems, supporting Windows environments, and working with Microsoft 365 tools. I focus on reliable system performance, clear documentation, and delivering practical, user-focused technical solutions.

Career Objective

Enthusiastic and results-driven aspiring Android Developer with a strong background in Java and mobile application development. Experienced in building real-world applications such as crime reporting and hospital management systems. Seeking an entry-level role or internship to apply my skills in developing impactful and user-friendly mobile solutions.

Technical Skills

- **Programming & Frameworks** - Python (Flask, Fast API), JavaScript (React.js), C#
- **Developing Application**-Android studio, Flutter flow, Base 44
- **Database** - SQLite ORM, Relational Database Modeling, access
- **Computer Science Fundamentals** - Data Structures, Algorithmic problem solving,
- **Debugging & Testing** - API Testing (Thunder Client), Scenario-Based Testing, Debugging and Error Handling,
- **Tools and Practices** – Flutter flow, Git, GitHub, Base44I, Claude Coding Assistants for debugging, documentation, and test case generation

Soft Skills - Problem-Solving & Troubleshooting, Communication with Non-Technical Users, Time Management & Task Prioritization, Attention to Detail, Customer Support Orientation

Projects

Crime Reporting Mobile Application

- Developed an Android app that enables users to report crimes efficiently.
- Implemented login and signup system.
- Integrated SQLite database.
- Created dashboard for viewing reports.

Hospital Management Mobile Application

- Developed a mobile app for managing hospital operations.
- Implemented patient registration and record management.
- Designed user-friendly interfaces.
- Integrated database for storing records.

Breast Cancer Diagnostic System

- Developed a system to assist in early detection of breast cancer.
- Implemented data input and classification of tumors (benign/malignant).
- Applied basic machine learning or rule-based analysis.
- Designed for fast and accurate diagnostic support.

Work Experience

City Hall Annex - Nairobi City County

Jan 2025 - Apr 2025

IT Support Technician

- Serviced and repaired printers and computers during malfunctions, reducing downtime for staff and clients.
- Installed and updated essential software such as Microsoft Office Suite and other productivity applications.
- Assisted clients with technical issues and provided guidance on software and hardware usage, improving customer satisfaction.

Currently seeking opportunities to gain practical experience in software development.

Education

Diploma in Information Technology
P.C Kinyanjui T.T.I, Kenya
Year of Completion: [2026]

Certifications

Java Programming Fundamentals
Android Development Basics

Key Strengths

- Problem solving
- Quick learner
- Teamwork
- Attention to detail
