

Christine Kakina Mutisya

Email: christinekakina@gmail.com
Phone: +254 700820118

SKILLS SUMMARY

Languages:	Dart, Kotlin, Java, Python, PHP, HTML5/CSS, JavaScript
Frameworks:	Spring Boot, Flask, Django, React.js, Angular.js
Mobile:	Flutter, Kotlin, Java, React Native, Mini App Programs
Tools:	AWS, Power BI, Tableau
Database:	Workbench ,MySQL,SQL, PostgreSQL, MongoDB
API:	RESTful API design and integration
Data Science/AI:	Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision, Data Analysis,Model Deployment
Soft Skills:	Excellent communication,effective people management, cross-functional collaboration, problem-solving abilities

WORK EXPERIENCE

- Fullstack Developer.** | Jaguar Petroleum | 01/01/2024 - Current | Nairobi, Kenya
- Lead Software Developer** | Tuma, TryKe | 01/06/2023 - 01/01/2024 | Nairobi, Kenya
- Data Science Intern** | iLab Africa | 01/08/2022 - 01/08/2023 | Nairobi, Kenya

EDUCATION

- Bachelor of Science in Mathematics and Computer Science** | Jomo Kenyatta University of Agriculture and Technology | 01/08/2018 - 01/08/2022 | Nairobi, Kenya
- Field of studyMathematical Sciences | Final grade: Second Class(Upper Division) | Thesis: Automation of Healthcare Services in Kenya | Address: 6200000200

CERTIFICATION

- Advanced Data Science Certificate** | Regenesys Education | 01/09/2025
- Natural Language Processing Certificate** | Regenesys Education | 01/09/2025
- Computer Vision Certificate** | Regenesys Education | 01/09/2025
- Fullstack Software Development(MIT)** | eMobilis Mobile Technology Institute | 01/12/2022
- Python Programming Language Certificate** | eMobilis Mobile Technology Institute | 01/12/2022
- JavaScript Certification** | eMobilis Mobile Technology Institute | 01/12/2019

PROJECTS

- J-Gas Mpesa Mini App**
A lightweight mini app enabling gas ordering, payments, and delivery tracking directly within M-Pesa.
Tech: AXML, JavaScript, JSON, CSS, Java
- IoT J-Gas Web App**
An internal web application for real-time gas usage tracking and monitoring using IoT integrations.
Tech: Flutter, Java
- J-Gas Application**
A dual-user (vendor and customer) logistics app for gas ordering, delivery tracking, and usage monitoring.
Tech: Flutter, Java, Workbench
- E-Mobility Application (Tuma Tryke)**
An in-house app for admins, customers, and riders to manage e-bike orders, rider tracking, energy consumption, and system support.
Tech: Python (Django), Flutter
