Personal Statement

EdTech has emerged as a pivotal force in today's educational landscape, offering transformative benefits across various dimensions of learning. From enhanced teaching and learning, to access to a broader range of resources, Priscilla is inspired by the transformation of education over the years through technology. She recognizes the tidal wave of data that can either sink or sail educational endeavors. She believes that leveraging technology responsibly will empower individuals to reach their full potential and fulfill EdTech's promise of equitable education.

Courses

Data and Software Architecture
AI and Machine Learning
Back-end Development
DevOps Engineer
Front-end Mobile Development
Front-end Web Development
UX Research
Product Management

Mikisa Priscilla

Software Developer

Skills

- Knowledge of analytical tools like Tableau and Excel to gather insights, make algorithmically informed decisions, and measure product performance.
- Proficient in writing SQL queries to extract meaningful insights from large datasets efficiently.
- Knowledge of Machine Learning Basics such as Scikit-learn, predictive modeling, and exploratory data analysis.
- Ability to carry out Statistical Analysis through A/B testing.
- Knowledge of object-oriented programming concepts in Python, Kotlin, and JavaScript for modularity and reusable code.
- Able to create RESTful APIs using Django Rest Framework.
- Ability to implement visually appealing user interfaces using libraries like ReactJS and Frameworks like NextJS.
- Skilled in integrating APIs using libraries like Retrofit in Android to create interactive mobile user interfaces.
- Skilled in defining and aligning product vision and roadmap with strategic business goals using tools like Jira and Confluence.
- Proficiency in conducting user research leveraging research methodologies such as interviews, usability testing, contextual inquiries, and surveys.
- Ability to use Git as a version control system to manage code changes and enhance collaboration.

Education

AkiraChix

codeHive - Diploma in Information Technology
February 2024 - November 2024

Projects

1. SawaTok – Speech Fluency Analysis Tool

Created visual dashboards using Tableau and Python (Matplotlib, Seaborn) to analyze trends in speech improvement over time.

SawaTok is a comprehensive interactive solution aimed at helping children aged 4 to 6 improve their speech articulation. It utilizes a PostgreSQL relational database along with a Django API to manage data and features a Next.js dashboard for easy user access and monitoring. Visuals are presented on an IoT device, creating engaging and hands-on sessions that motivate children to speak clearly as they progress through the program.

2. Weather Forecast Dashboard

- Fetched real-time weather data using RESTful APIs and visualized it in React.js and Tableau.
- Extracted key insights from historical weather patterns using SQL queries.
